Résumé: (traduction alternative)
Short but varied canyon with 3 higher steps around 20m. The canyon is partly nice and narrow, then again a bit wider, there are no exit points. The scours are mostly gravel so that no major jumps are possible. Due to the shortness, a combination with the VordererSpringbachCanyon is possible, which flows into the Stranegg right next to it.

Hydrologie:

Accès: (traduction alternative)
Leave the A9 at Ried im Traunkreis and drive via Pettenbach, Scharnstein, Grünau into the Almtal valley. At Habernau (Gasthof Jagersimmerl) turn off in the direction of Ödseen, Almtalerhaus. After about 3km you park in one of the parking bays near the exit.

Approche: (traduction alternative)
Follow the road for about 500m into the valley and then turn right onto a forest road. This leads over a bridge over the Straneggbach and after another 500m directly to the bridge at the waterfall. Shortly before you climb over a ridge on the left and land at the beginning of the waterfall where you can already see the BH flashing. You can then, depending on your mood, continue to climb orographically right in the forest and enter further up. During our ascent, we took the next step, which was also equipped with a chain anchor. Possibly there are above also still nice passages.

Tour: (traduction alternative)
Above the bridge there are a few short rappel but also nice narrow passages. Then the canyon becomes more vertical, in total there are 3 20m steps and a few smaller ones. In between there are always nice scours to wade through.

Retour: (traduction alternative)
Cross the Straneggbach stream and return to the car on the road.

Automatisch importiert von Descente-Canyon.com für Canyon Springbach Hinterer Canyon is in good contition, couple of trees, hedging was ok.Recommendation: I recommend taking more ropes for the triple cascade in the middle of the canyon (in the past the heights were 15, 5, 20 m)During certain periods, it is not possible to reach the marked place by car. Free parking in front, then approx. 3 km walk. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22791/observations.html)
