Saison: mars - novembre	**Orientation:**	**Meilleur moment:**
Évaluation: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Spécialités:

Matériel:

Résumé: (traduction alternative)
Recently opened by members of EGAN, along with its neighboring bco Espinedes. They are two simple dry descents, except after rains, in which we will enjoy some long rappel and a magnificent environment. It is not bad to carry spare material (cords above all).
Access relatively simple and fast by the track almost up to the ravines, if we have high vehicle we can arrive almost to the head and to make combination.

Hydrologie:

Accès: (traduction alternative)
On the C16 from Berga to Puigcerda. We will pass Cercs and just at the p.k. 110 we will have the detour to the right to Malanyeu.
In this wonderful environment of beech and oak forests we will be located, ideal for autumn, in which we will enjoy both the part in vehicle and the walk to the headwaters.
We will pass Malanyeu and continue along the track for 1 km until we reach a crossroads. Here we can leave the vehicle (exit Espinedes).
If we have high vehicle (especially for combination) we can climb this track another 600m to the exit of Saltant, soon we can park. Almost another kilometer up in a left curve we would have a third area to park near the head of both ravines.

Approche: (traduction alternative)
We will go up by car or on foot to Espinedes's borda, once here, through dense forest in NE direction, without practically losing height we will arrive at the head of the ravine.

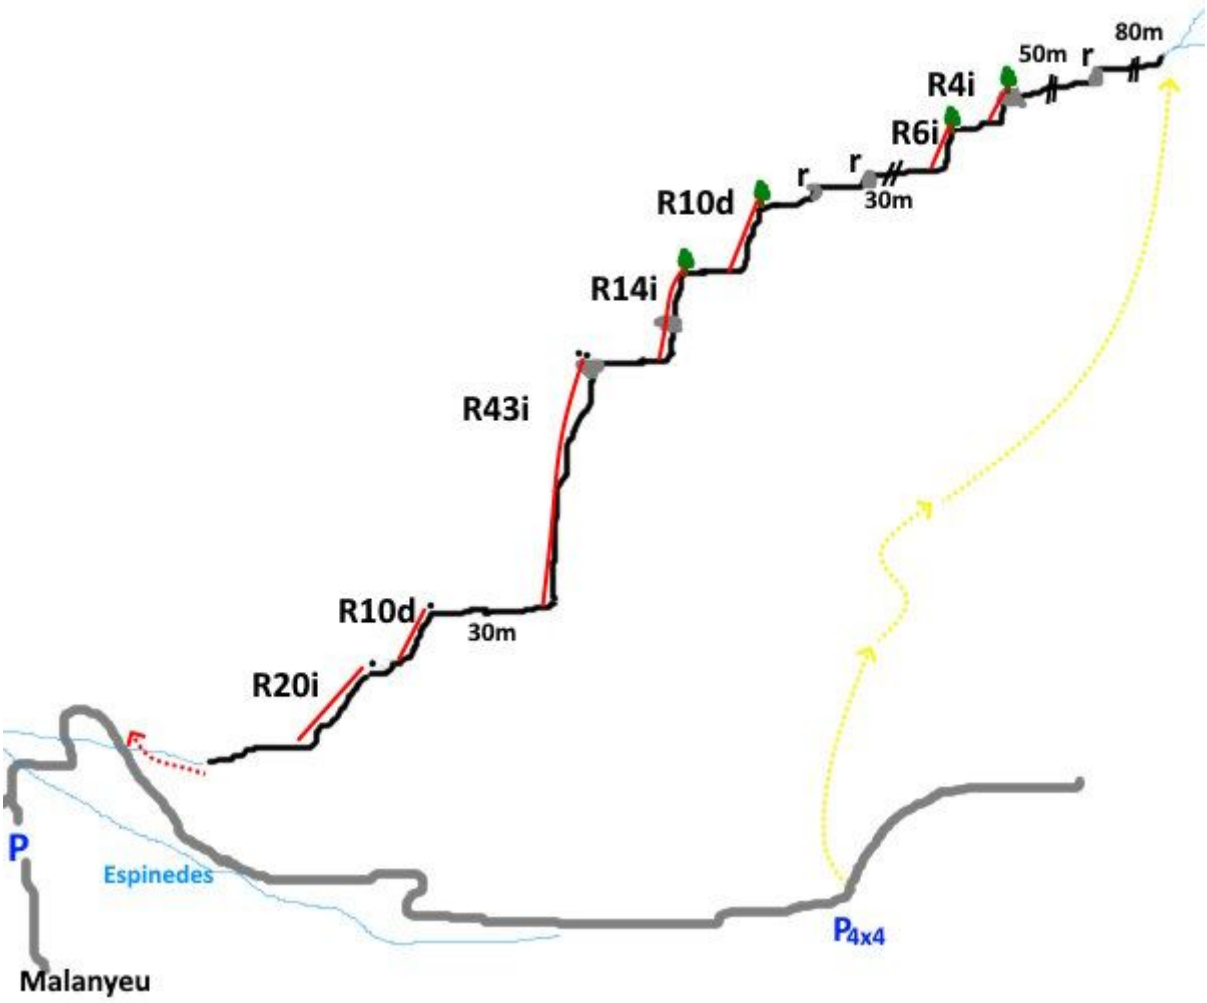

Tour: (traduction alternative)
A few simple first rappels from natural to reach the beautiful R43 that has 2 parabolts and gets us back into the forest. A couple of small "ramp" rappels to get to the trail.

Retour: (traduction alternative)
If we want to combine with Espinedes we will take the track to the left towards the head. If we want to return to the car we will take it to the right to go down.
