Résumé: (traduction alternative) Rather short tour; best time is in the afternoon; very beautiful pools with impressive abseils and jumps of up to 15m; emerald green water; beautiful view of the valley; highly recommended tour!		
Hydrologie: (traduction alternative) Infoline power plant: +41 91 756 93 01		
Accès: (traduction alternative) From Biasca ri. Locarno --> into the Maggia valley --> into the village Giumaglio over the bridge and immediately the first street to the right --> here li first parking possibility or follow the street to the right and directly at the bridge small parking possibility --> here you already have a view of the last rappel C40 and the water level (approx. 360Hm).		
Approche: (traduction alternative) From the parking lot, walk towards the church --> behind it, several narrow alleys lead to the hiking trail that leads up to Cappella di Cima --> the stone steps go up steeply throughout --> past the iron gate to a small stone house with a fountain (approx. 540m) --> behind this house you have the first descent option into the canyon (entry Nizzola Eldorado Ticino)--> 2nd option is a little further up at the pilgrimage house --> follow the stone wall here until you reach a steel cable with a tree --> 3rd option is at the 2nd pilgrimage house on the right at the pilgrimage house. The second option is a little further up at the pilgrimage house --> follow the stone wall until you reach a steel cable and an abseiling point R25 from a tree --> 3rd option at the 2nd pilgrimage house right towards Camusegn and follow the path to the bridge.		

Tour: (traduction alternative)

Long option: Walk along the stone wall at the first option house to the rappel from Baum (R25) --> now you are standing in the streambed --> a short walking passage follows through a mighty chaos of rocks that you can easily bypass on the left --> there are further small climbs up to the gigantic granite boulders that you bypass on the left via a rope traverse --> after further climbing on the left there is a boulder with a fixed rope and rappel C15 through a gap --> a nice jump or rappel follows. rappel of approx. 10m into a very deep pool --> after the swimming passage it gets narrower --> rappel left approx. 16m --> narrow pool in very clear water up to the point where you can jump, rappel or slide (deep pool) --> the next point is very narrow, so jumping is only for experienced climbers --> the next 40m of rappels are lined up at different depths and some have sharp edges --> the view of the next pool and the valley is beautiful (the afternoon sun is ideal) --> the last rappel can be bypassed on the right, but the lowest pool at approx. 350Hm still invites for a swim.

The indicated access and descent times apply to the entry as described in Eldorado Ticino.

The description of the tour between the bridge and the Nizzola entry is missing.

Be careful on the sharp edges;

Retour: (traduction alternative)

At the pool before the bridge (ca. 360Hm) right up the stone steps and left through the wooden gate to the road and to the first or second parking lot.

Automatisch importiert von Descente-Canyon.com für Canyon Giumaglio Fait au coucher de soleil, supers condis, 1h45 voiture voiture. Comme il pleuvait toute la journée dans la vallée de Lodrino, on est venu ici . (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2668/observations.html>)

Everything is ok, for the last 50m of access you could take a hedge trimmer with you to cut away the thorns. (traduction alternative)

Automatisch importiert von Descente-Canyon.com für Canyon Giumaglio Nous n'avons parcouru que la partie inférieure, avec l'approche juste après la maison.Au moins la moitié des ancrages sont extrêmement mal positionnés. Sauf pour les entreprises qui vendent des cordes.Avec un peu plus d'équipement aux bons endroits, ce canyon pourrait être beaucoup mieux équipé.Nous avons installé trois nouveaux ancrages afin d'améliorer un peu la situation :Un comme point de départ pour la main courante au première rappel (l'ancien crochet est tordu depuis plus d'un an et le boulon est visible sur près d'un centimètre. Afin que chacun puisse se faire une idée, nous l'avons laissé là - le nouveau crochet se trouve à deux bons mètres au-dessus, aussi rive gauche).Un autre quelques cascades plus loin, avant le rebord sur le côté gauche orographique. Ici, on peut facilement se positionner et changer la corde. En bas, on peut se détacher et sauter le dernier mètre.Le troisième se trouve à la première grande cascade, à un bon mètre en dehors de la ligne normale, également sur le côté gauche orographique, derrière une niche rocheuse, là, ou il y a eu le plus grande frottement. Là aussi, on peut très bien se positionner sur un large rebord et le rappel qui suit est presque sans frottement. Accessible from the water level, but high. Infoline had no objections. Very nice tour. Some anchor points very good, others so-so (traduction alternative)

2025-10-08 | Christian Balla | |📖|📌|🌊 Haut |👎 Pas fait

Operator Infoline has strongly advised against a current ascent, as the reservoir is full and a flood wave could occur at any time. Fortunately, there are plenty of alternatives (traduction alternative)
