Résumé: (traduction alternative)
Canyon with two parts, the upper part more sporty and the lower part to walk along a generally dry riverbed and without great interest.
Given the little interest of the lower part and the necessary combination of cars we will focus on the upper part.

Hydrologie:

Accès: (traduction alternative)
We must reach the town of Gestalgar.
We can go by the A3 from Chiva/Cheste by the CV379 or by the CV35 from the detour of Villar del Obispo by the CV395.
At km 16.5 of the CV379, if we go towards Gestalgar we have a detour to the left "Camino del Campillo", after 400m we take the detour to the right, almost a kilometer we cross a small bridge and continue straight ahead (we leave a track on the right). After 3kms from the road we find a track on the right (if we skip it we reach a couple of sharp bends).
Taking this track (in worse condition) we will go without deviating as far as we can, if we have high car or 4×4 to the end of this track, it is about 3kms.
If we want to do it integral:
With the return car, on the outskirts of Gestalgar by the CV379, just across the Turia we have a detour to the Fuente de Peña María, take this track and go around the walls until you reach the end of the track (parking enabled).

Approche: (traduction alternative)
If we have been able to reach the end of the track, the access is immediate, otherwise we will have to walk this part of the track.

Tour: (traduction alternative)
3 nice rappels and then exit to the left to the PR.
If we want to continue and make it integral we will follow the PR to the right and a few hundred meters later we will return to the riverbed.

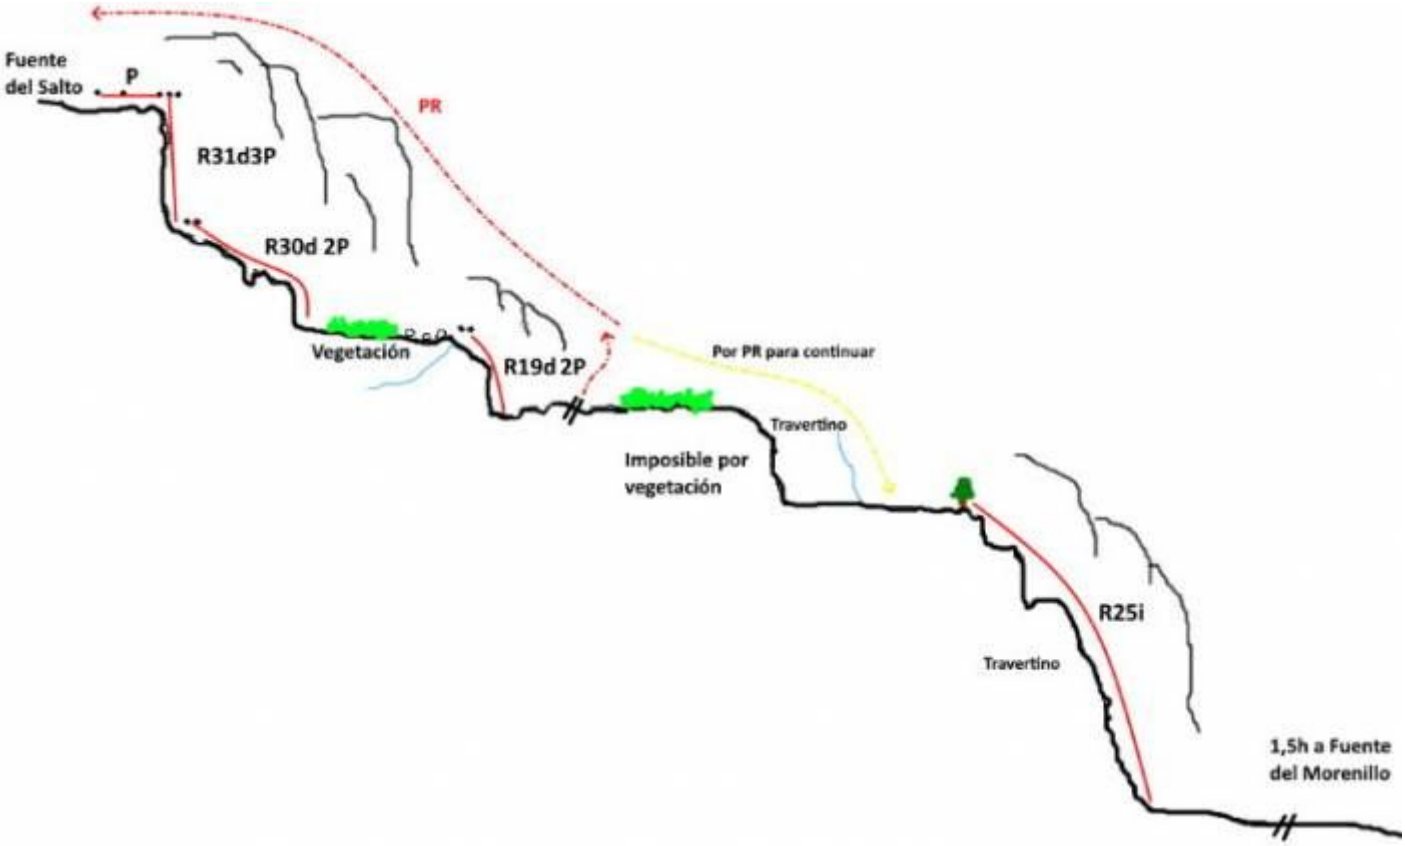

Retour: (traduction alternative)
If we leave from the upper part, we will take the PR to the left going up the hill to go down to the riverbed and the access track.
