Résumé: (traduction alternative)
Hiking and swim canyon

Hydrologie:

Accès: (traduction alternative)
We come from Muscat on the "15", pass the turn-off to Nizwa in the north after about 155 km, cross the Wadi Mahanna a little later and after another 37 km meet the "21", which comes from Bahla in an easterly direction. We now continue on the "21" in the direction of Ibri, but after 34.8 km (from reaching the "21") we turn right (in a northerly direction) to Al Ayn. After 25.8 km we get there and can take a look at the "beehive tombs" (Al Ain beheeve tombs) located on a hill. Then we continue for another 11.5 km and the road finds its continuation in the streambed of the Wadi Dham. Depending on the condition of the road and the weather conditions, you can drive up the wadi in a 4x4 vehicle until you reach a large semi-cave within sight of the dam that drains the water. We park the car here at the latest.

Approche: (traduction alternative)
From the car, walk towards the orographic left rock face and follow the path that climbs up under the walls. Later it descends into the river bed. We see an old stone carving on a boulder and pass a small sinter pot. Later, on the left, we see a shallow boulder (which you can also swim under) covered with vegetation. Where the river makes a bend of about 90 degrees, there is a cave on the righthand side, from which a spring pours out.\nNormally, this is the turning point. However, you can also walk further upstream and after a largely open stretch of river you will come to another attractive narrow section.

Tour: (traduction alternative)
Downstream, you can largely move around in the water. There are also some slides and possible jumps.

Retour: (traduction alternative)
Once you reach the water drainage and the car parked by the half-cave, the tour comes to an exit.

Coordonnées:
Départ du Canyon 23.2326 57.0815
Parking à l'entrée et à la sortie 23.2288 57.0676
Fin du Canyon 23.2338 57.0731
