Matériel: Cordes: 2x50		
Résumé: (traduction alternative) Aquatic rappel canyon Almost all rappels in the water jet		
Hydrologie: (traduction alternative) The stream constantly carries a lot of cold water. Even after 3 weeks without rain. It is fed by many springs		
Accès: (traduction alternative) Coming from Ilanz, take the main road in the direction of Vals. After the small village of Lunschana, park immediately behind the next gallery on the right-hand side. The second car or a bicycle can be parked further up the road. This parking lot is located after a series of galleries just after the main road crosses the Vals Rhine, also on the right-hand side. You can see the water level from the main road if you follow it for another 200m.		
Approche: (traduction alternative) From the lower parking lot, cross the road and follow the forest path for about 50 m. The hiking trail to Alp Rischuna then turns off to the right. Follow this path up to an altitude of approx. 1910m. After the path crosses a rocky ledge, turn right onto a poorly visible hunters path. This leads steeply through the forest to the entry point.		

Tour: (traduction alternative)

At the beginning, the stream is more horizontal with only occasional rappels. This gradually changes as the stream becomes more vertical and there are no more walking passages between the rappels.

Although the stream seems rather open, it always cuts into the rappels so that you have to rappel in the water.

The rappels are nicely cut in and usually have an intermediate pump. The two high rappels with Gysir each have their rappelling routes on the orographic right-hand side.

Retour: (traduction alternative)

After the last rappel through the forest to the Vals Rhine, cross it at a suitable point and climb up to the road on the other side.

Well, you can do that. It's much more sporty than it looks at first glance. From 1800m to 1400m there are rather few anchors, so it doesn't hurt to take more with you. (traduction alternative)

Première descente: 01.08.2019 par Reto Bubendorf und Nico Schneider (oberen 350 hm), die unteren 200hm waren schon von Timo Stammwitz eingebohrt
