Spécialités:

Matériel:
Cordes: 1x50m+2x20m

Résumé: (traduction alternative)
Forest canyon that becomes more interesting towards the exit.
The first part is narrow and incised - the second part is more open and vertical.

Hydrologie: (traduction alternative)
An emergency exit at about the halfway point.

Accès: (traduction alternative)
We leave the E62/SS33 at the Villadossola exit and drive along Via Sempione via Beura-Cardezza and Quarata to Cosa.
We park the car in front of the church of Guiseppe Artigiano. It is located at the foot of the hill, not far from the exit from the Robana.

Approche: (traduction alternative)
From the parking lot, walk south along the foot of the slope until you reach the path to the San Lorenzo chapel. Turn left up here. Once you reach the chapel, take the path to the left across a meadow just a few meters further on. It leads us directly to the entry (see map in the photo album and gallery).

Tour: (traduction alternative)
At the beginning several small rappels, connected with running sections. At the exit, the "highlight" with the 50m drop.

Retour: (traduction alternative)
After the last rappel, descend a few more meters in the stream, then take the stone steps with railings to the left and through the forest in a few minutes to the church and the car.

Coordonnées:
Parking à l'entrée et à la sortie 46.0959 8.3128
Départ du Canyon 46.0951 8.3198
Fin du Canyon 46.0963 8.3150

Automatisch importiert von Descente-Canyon.com für Canyon Robana Entre gros petit filet et petit débit correct avec quelques nages où on apprécie la combinaison. Plutôt mignon sans être incontournable. Il faudra faire attention si parcouru en gros débit parce que les désescalades ne sont pas équipées et glissent l'enfer. Équipement en bon état (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23545/observations.html)

An easy path until the start of the canyon; the first rappel is from a tree on the left. It’s actually not very interesting until the bridge, where the final section begins. If you want to skip this part, there’s a path on the right that leads to the bridge. Before the last 50 rappels, one anchor is completely missing—you can either use the other three or carefully jump onto your back. The anchors definitely need improvement. (traduction alternative)

Weapons okay, although the dubbing could be improved and some fixed strings replaced (traduction alternative)

Shortly done in the afternoon, good start tour after 6 hours drive to prepare for the next days. Most of the anchors were ok, on the penultimate rappel before the 50-pitch anchor on the intermediate belay completely loose. The highlight is the final waterfall. (traduction alternative)

Good alternative when all other gorges have too much water. It smells a bit like stale water. Installations are good. (traduction alternative)
