Accès: (traduction alternative)
From the entry of the Kobelache, continue in the direction of Sattelalpe (do not turn off towards Kobelalp), drive to the next bridge and park the car there.

Approche:

Tour: (traduction alternative)
Directly after the bridge we start with 10m rappel, swim and almost 60m multipitch mostly through the water jet.

Retour: (traduction alternative)
It is best to take the first steep dry stream on the orographic left. (The cairns in the streambed obviously do not mark exit points, but are intended to encourage further walking in the stream) Alternatively, descend further and take the shuttle back up, but this is not interesting.

Preliminary note: The descriptions of the inspections of 03.05. and 06.07.2025 obviously do not concern this part of the Kobelache, but - possibly a part ("Merlins World") - of the "conventional" Kobelache. In this upper Kobelache there are currently neither fixed ropes nor "pools and slides" (plural). Some anchors are "expandable". Exit left upwards also possible in a chute before the river bend (dry scree at the beginning), but also not easier than on the suggested exit. (traduction alternative)
