**Spécialités:**
Ruisseau de pluie,

**Matériel:**
Cordes: 2 x 60m

**Résumé:** (traduction alternative)
Vertical tour, mostly dry. Interesting in spring after rain

**Hydrologie:**

**Accès:** (traduction alternative)
Between Osogna and Biasca, turn off to the large catch basin. At the very exit there is space for a good 5-6 cars (see coordinates)

**Approche:** (traduction alternative)
The ascent is orthogr. right. Especially the first 5 minutes are practically pathless; just steeply uphill (keep left)
Once you have found the path, follow it uphill for a good 60 minutes with the help of the RED trail markings; partly exposed, secured with steel cables and often with several possibilities (make it shorter or longer, ...) you go up; at about 800 hm a path points right to the stream entry at about 750 hm
The path is roughly marked on the Swiss topographic view, on OSM etc. nothing is currently visible.

**Tour:** (traduction alternative)
First some shorter rappels (max. 35m). Then you reach the high edge; this is divided into approx. 55m / 50m / 15m / 35m.
At the second higher abseil, after approx. 20m to the right of the water course, you reach the belay for the final C50

Thanks to Lars , Luci ,..etc for setting it up and making it "public"

**Retour:** (traduction alternative)
From the stream to the car.

Super Bach for rainy days, well-described, and fantastic views. The access is steep but in good condition and marked in red and blue (some variations are confusing, so thanks to the tracks). The access is exposed in places, but there’s a V5 coming up anyway... The anchors are very good, though some are single-point. The intermediate anchor on the second wall is in the water; it was run over. (traduction alternative)

Wonderful and vertical. For maximum sun: it's best to start at midday at the entry point. (traduction alternative)

Very nice vertical alternative tour if there is otherwise too much water. Swisstopo is highly recommended. At the beginning it is quite a search until you find the path, then it is super well marked. At 560m you have to leave the well-marked path before the wire insurance to gain altitude. The path you branched off onto to gain altitude is then immediately visible and marked again. The tour is very well set up. ATTENTION at the last large cascade or. Keep RIGHT in the direction of the main water flow, as described, otherwise you will miss the 50m stand. For all those who, like us, do not read the description thoroughly, there is now a sling with a majon link □□ near a tree in the wall, ortographic left. However, this is relatively difficult to reach and not recommended! So read the description □□ (traduction alternative)

Good choice ! (Thanks Luci ;-) ) when there is a lot of water in Ticino. Great if you like vertical canyons. About 30 minutes before us the stands were extended/improved,...perfect service ;-) (traduction alternative)

Good option for bad weather, but otherwise dries quickly. (traduction alternative)
