Résumé: (traduction alternative)
Canyon for beginners, currently widely used by companies. Only 3 rappels, an almost immediate access and a very short return, with the possibility of making several jumps if the flow is adequate. Caution after rains

Hydrologie:

Accès: (traduction alternative)
From Angles or from Sant Hilari Sacalm on the GI542 to Osor.
You can park in the village, on the other side of the bridge, in the parking lot. The other option, where we parked before, was in the curve of the road, before the p.k. 11 where the two ruined houses are. It seems that they have put a chain and it is forbidden to park here.

Approche: (traduction alternative)
If you can park in the curve the access is immediate, between both houses there is a path that goes down to the riverbed. Otherwise from the bridge we go up to the road and walk to the indicated curve, it is just over a kilometer.

Tour: (traduction alternative)
Simple descent to start canyoning, 3 rappels and several jumps. The good thing is that there is a path next to the descent that allows us to go back up easily and repeat the descent.

Retour: (traduction alternative)
If we have parked in the curve by the path on the left orographic going up the riverbed. Otherwise we go down a little further to take the track on the right that will take us to the Font de Can Bosc and from there to the road.
