Résumé: (traduction alternative)
Close to the ski resort of Guzet this canyon is predominantly vertical in character. It has some really beautiful waterfalls.

Hydrologie:

Accès: (traduction alternative)
We have to go to the ski resort of Guzet-Neige, for this we arrive at Saint Girons and go up the Salat river until we reach Oust and by the D3 we pass through Seix and Moilin Lauga until the detour (on the left) to Ustou by the D8. We pass through Le Trein and arrive at Sérac. Here there are two options to leave the car back:
1.- At the first sharp turn to the left we leave the car back.
2 .- Leaving Sérac take a track to the right that goes between the farms and after two curves (right and left) can be parked to one side.
If we have two cars, with the other we continue towards the Col de Latrape. Before arriving at the Guzet-Neige turnoff, there is a track on the right, along which we will go a little more than a kilometer until a sharp bend to the left where we can see the river on our right.

Approche: (traduction alternative)
With two cars it is immediate.
With a car you have to walk towards the Col de Latrape and halfway up the slope take a path that will take you to the track that you can access by car.

Tour: (traduction alternative)
A first simple sector leads us to the interesting part of the descent, 4 chained waterfalls without escape with the attraction of rappels of 40 and 18m. The V5 rating is given to the natural installations to be made.

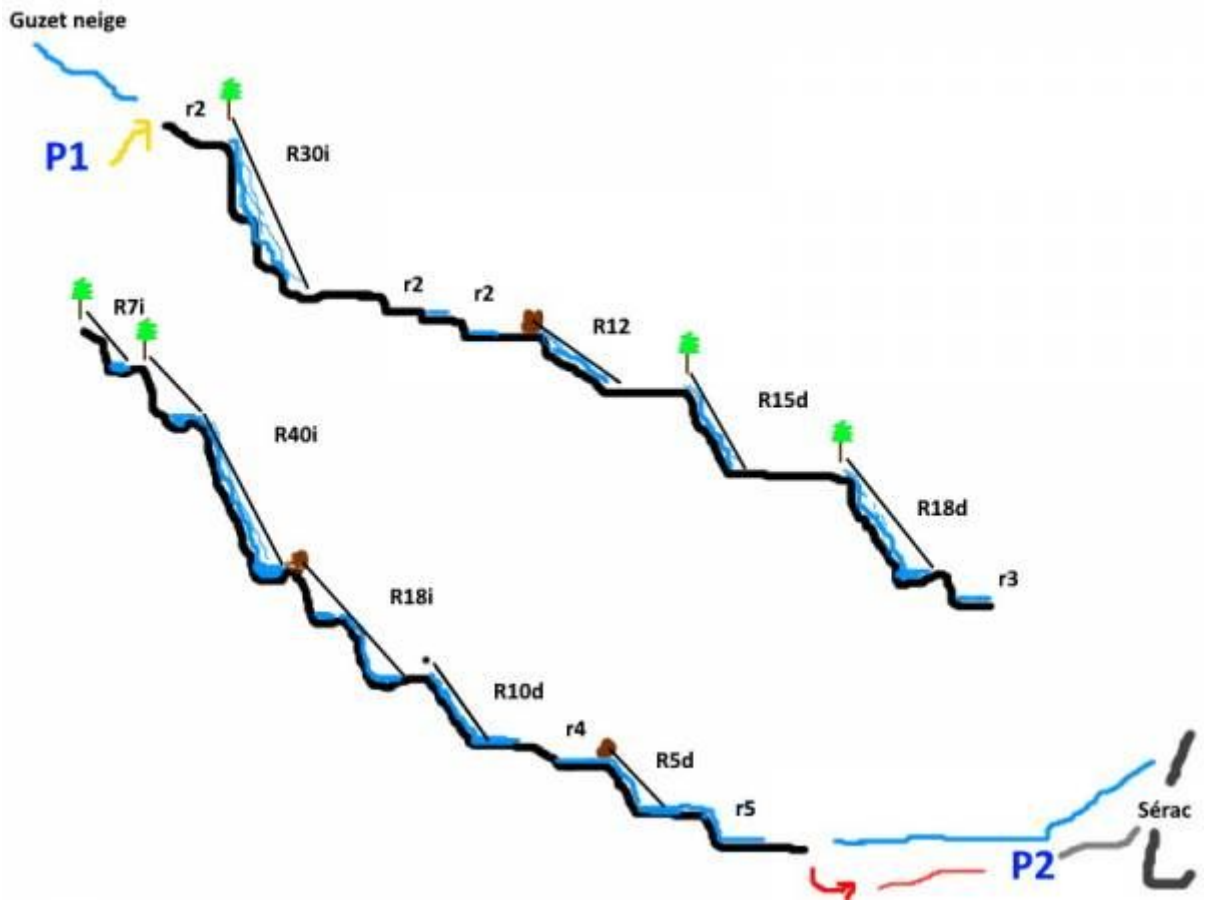

Retour: (traduction alternative)
About 250m along the left bank and then cross to the right to, crossing the fields, reach the car if we have left it in the curve. If it is in the farms, we follow the right bank of the river and along a path we arrive at the place where we parked.
