We ascended via the hiking trail on the orographic left. This time, the entry point to the stream was marked with blue paint on a tree. All the belay stations were in good condition except for the second-to-last one. There, we rappelled down from a tree that was wedged in place because the ring was missing. (traduction alternative)

Nice little tour. Stands all in order. Can agree with the previous statement with belay number 4. If the next group were to tie in a piece of remaining rope (approx. 2-3m) the problem would be solved. (traduction alternative)

On access via the forest road, the entry was easy to find if you keep right at the first junction behind the cow gate. The holds were all good, some new chain anchors were drilled in. Only at abseil point no. 4 was the anchor difficult to reach. Otherwise a beautiful canyon with lots of downclimbing and a few nice rappels. (traduction alternative)

Access via forest road to the hunting lodge, easy to find. At the penultimate abseiling point (no. 2) the rock is undercut. Otherwise everything is in order, very well equipped. (traduction alternative)

Stands all in order so far. The entry is not so easy to find. We entered from further up through a dry streambed behind the slide brake (traduction alternative)

Description fits, abseil stands all okay, only the hunting lodge used as an entry marker can be seen poorly or late (traduction alternative)
