Résumé: (traduction alternative)
Vertical ravine, dry, except after rains and with good views. If we do it with two cars, the accesses and returns are very short.

Hydrologie:

Accès: (traduction alternative)
Situating us in La Pobla de Segur on the N260.
At the traffic circle of Pont de Suert, Tremp or Sort, go to Sort, cross the bridge and take the next street on the right towards Claverol. Go down to the traffic circle and continue to Aramunt and Claverol crossing the bridge over the Noguera Pallaresa.
After crossing the bridge we continue on the right and after 150m we turn left on the road that goes up to Claverol. From here, with the car back we enter the village by the C/ Eras and follow it straight ahead until leaving the village, here it is already a track in good condition that we will follow straight ahead to go left to the Barranc de Claverol, along this track we approach as close as we can to the next ravine which is the Font d'Artic. We park where we do not disturb.
With the access car, if we have it, we will return to the road and continue for almost 3.5 kms. Here the forest opens up and we have room to park on the left, with a track that goes off to the right.

Approche: (traduction alternative)
We take the track that is to the right of the road and go up the slope. It zig-zags up the mountain and out of the forest, here we will go to the right, heading west to go looking for the valley that is forming until you reach the cut where our descent begins.

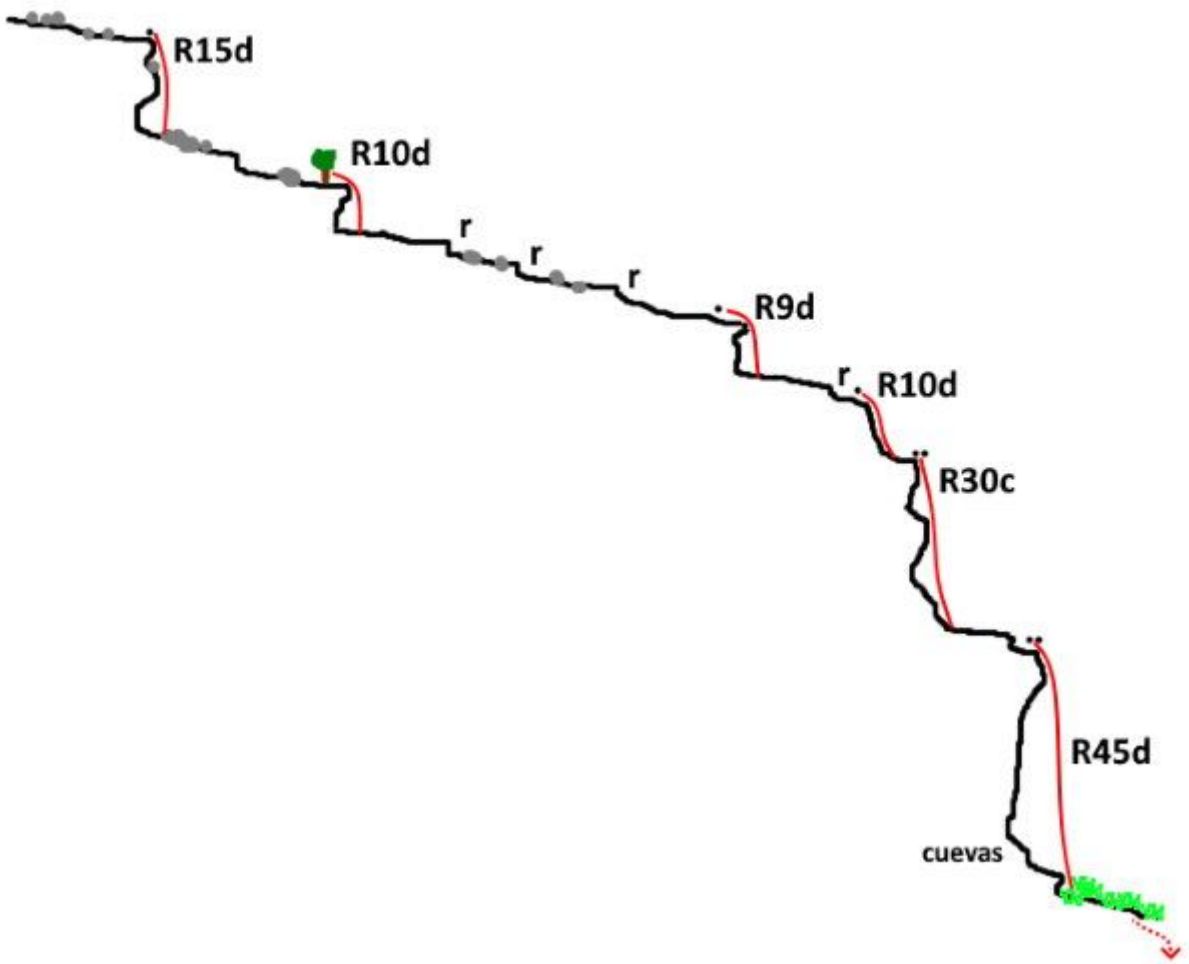

Tour: (traduction alternative)
Very vertical and almost without rest. The last 45m rappel is a marvel.

Retour: (traduction alternative)
We will arrive at the lower part, at the caves, we will continue a few more meters until we find a path, above the electricity pylons that goes to the right, to cross some fields on the upper part before descending to the track where we will have parked.
