Résumé: (traduction alternative)
Short and very watery gorge with impressive individual sections. Only feasible after long dry periods.

Hydrologie:

Accès: (traduction alternative)
Coming from Tarvisio, drive over the Predil mountain pass and through Log pod Mangartom. Drive out of the valley over the gorge of the Kortitnica (here you can park a second car) and continue downhill until you almost reach the level of the Koritnica stream again, parking on the right just before a sand road.

Approche: (traduction alternative)
Cross the bridge and ascend to the right onto a hiking trail. When the hiking trail reaches the sand road, descend to the right to a bridge over the Moznica gorge. Entry above this bridge. You can also start the tour higher up (starting point 750m). Several small steps and slides in the lower gorge.

Tour: (traduction alternative)
Several small but massive steps until you reach the first rappel.
* 12m rappel from anchor left. The belay must be climbed strenuously.
* 4m rappel from anchor right
* 6m rappel from anchor right
* 22m rappel from anchor right behind the edge, be careful when reaching the belay, better belay from the previous belay. Then rappel through the rock gate.
* 15m rappel from anchor left
* 10m rappel from anchor left. From here only downclimbing and sliding, first in an open canyon then in a somewhat narrower gorge.

Retour: (traduction alternative)
At the exit of the canyon, turn left across a meadow back to the bridge.

Anchors still somehow ok. It would be ice to be replaced. Take some mailons with you. We had quite ok flow, but still pushy on some parts. Be careful on the undercut in the upper part and sifon in the lower part. Otherwise beautiful canyon!

What a light there is. Sporty but easy to do. (traduction alternative)
