A good alternative after the rain and storms—and it's fun at this water level, too (traduction alternative)

We did this trip in the late afternoon after heavy rain in the morning and afternoon. Good option if there is to much water in the other canyons.

Anchorages sometimes a bit adventurous but OK. Tolerates a lot of water. (traduction alternative)

With the current amount of water, many loose stones are being carried over the two C30s. For this reason, and because the pick has been removed from the last C30 (anchoring to a tree is possible), we left the route after the C8RD. A clearly visible path leads directly to the ascent route. (traduction alternative)

The stream was a good alternative after rain and more rain was forecast. The water level was slightly higher than the higher reference pictures from "Eldorado Ticino". At the first rappel at the bridge we attached an additional rope. IMPORTANT: the last 30 (penultimate rappel) no longer has an anchor. We then went out. The tree may also be ortographic. Right. The left tree is unsuitable. (traduction alternative)

We started this canyon on a day when the top canyons in Ticino had too much water. Very good alternative. Reparking not necessary (traduction alternative)
