Matériel: Cordes: 2x30m		
Résumé: (traduction alternative) Short, beautiful vertical tour with a view of the Zugspitze; several slippery spots; almost all abseiling points are in the water; some sharp edges; well set up; nice little narrow sections; several escape routes; east-facing; often spectators at the last cascade; sedimentary rock		
Hydrologie:		
Accès: (traduction alternative) Coming from Germany you drive at the old customs office Ehrwald in the direction of the village Ehrwald. After a short distance across the border, there is a large cross and a sewage treatment plant on the right side of the road. Then there is a small bridge that leads over the Loisachbach with a parking lot for about 10 cars directly level with the road. Park here.		
Approche: (traduction alternative) From the parking lot, cross the nearby bridge. If you want to check the water level briefly, follow the cycle path (gravel) to the right after the bridge for 5 minutes. Then go back to the bridge and follow the asphalt mountain road (no driving) to the left in the direction of "Häselgehralm". After a rightward hairpin bend, the road leads over a bridge (Häselgehrbach). This is followed by a leftward hairpin bend with a cross. From here it is not far until you come more or less straight to the stream. The entry point is at approx. 1090m directly by the wooden beams (bridge) that lead over the Häselgehrbach.		
Tour: (traduction alternative) Apart from a short walking passage in the upper part, the canyon is very continuous. Depending on the depth of the water, some steps can also be slid or jumped. The canyon is technically not too difficult, but should not be underestimated at higher water levels, as you often have to rappel in the water jet and the rock is usually very slippery. Several small, beautiful washouts/chokepoints and the max. 25m high abseils in combination with the short access are ideal for a casual half-day tour.		
Retour: (traduction alternative) After the last cascade at approx. 970m, follow the cycle path on the right for 5 minutes back to the starting point.		
Coordonnées: Départ du Canyon 47.4209 10.9147 Fin du Canyon 47.4203 10.9170 Parking à l'entrée et à la sortie 47.4188 10.9159

The Häselgehrbach was at a normal water level today. A bit slippery, but the higher rappels were still manageable. I absolutely cannot recommend the R22 shown in the pictures with the tree sling. Massive risk of falling. Better to take the C20 on the right. There's a new chain anchor here. The rappel point before the final waterfall must be set up across both pools, since there's no anchor in the intermediate pool. A single 50-meter rope is sufficient for this section. At the final waterfall, we set up a rope slide from the intermediate belay station and had a bit of fun with some spectators after climbing back up via the via ferrata. On our next ascent, we'll place an anchor at the bottom of the pool to make it even easier to set up a rope slide. Otherwise, it's a really beautiful vertical stream with a rapid succession of 20-25-meter rappels. (traduction alternative)

2026-05-26 | Airmax | ★★★★★ | 📖★★ | 📍★★ | 🌊 Haut | 🟢 Terminé

Walked at high water level. It was fun. Currently more slippery than usual. Anchors are in the usual condition (ok). Photo of the last waterfall. (traduction alternative)

2026-05-24 | Kanyon Kerke | 📖★★ | 📍★★ | 🌊 Haut | 🛑 Pas fait

We climbed up to the entry point. The water level didn't suit us. We'll be back again. Photo of the final waterfall by the road. (traduction alternative)

2026-05-09 | Wolfgang Held | ★★★★★ | 📖★ | 📍★ | 🌊 Haut | 🟢 Terminé

Waterlevel may be higher than normal but still ok even rappels through the waterfalls. Lots of slippery spots - take care. (traduction alternative)

2026-05-09 | Joey CIA | ★★★★★ | 📖 | 📍 | 🌊 Normale | 🟢 Terminé

Beautiful rappel and rock formations. Very slippery. Superiore equipped. (traduction alternative)

2026-04-28 | Philipp | ★★★★★ | 📖★★★ | 📍★★★ | 🌊 Haut | 🟢 Terminé

Today, with a slightly higher water level compared to the pictures, it is still easy to climb as it is superiore equipped. Nice tour with comfortable access and a few aquatic rappels 📖📖 (traduction alternative)

2025-10-12 | Wolfgang Streicher | ★★★★★ | 📖 | 📍★★ | 🌊 Normale | 🟢 Terminé

Entry at the bridge. At the lower entry now chain on the tree; makes the rappel comfortable even for an old man. More slippery than I remembered. The final section currently has to be started via the pools, as there was no sling (with eyelet) left on the tree from which you could abseil through - see photo. (traduction alternative)

2025-08-01 | Christian Balla | ★★★★★ | 📖★★★ | 📍★★ | 🌊 Fou | 🛑 Pas fait

The water level has been monitored daily since 26.07. Sometimes massive changes within 12 hours. Approx. 3.90 km² catchment area, due to the constant rain we could not walk on the Häselgehr within a week. Yesterday the water level was high, probably (athletically) doable, today there is already far too much water flowing again and stones are constantly flying down the last waterfall. We were at the final waterfall yesterday and today and stayed there for a while. With a steel cable pulley you can have a lot of fun on the via ferrata and you don't have to do without a 20m rappel with water contact. (traduction alternative)

2025-05-14 | Christian Balla | ★★★★★ | 📖★★★ | 📍★★ | 🌊 Normale | 🟢 Terminé

All stands in very good condition, but in some cases only one anchor point. Very beautiful canyon with fantastic views. (traduction alternative)

2024-08-31 | daniel albrecht | ★★★★★ | 📖★★★ | 📍★★★ | 🌊 Faible | 🟢 Terminé

all stands ok (traduction alternative)

2023-10-08 | Patrick Klarner | ★★★★★ | 📖★★★ | 📍★★★ | 🌊 Faible | 🟢 Terminé

This time the water level was low, making it much less slippery. A small via ferrata is installed at the foot of the last abseil and there are climbing walls on both sides which are also suitable for a few rope exercises. (traduction alternative)
