Évaluation: ★ 3.1 (2) **Info:** ★ 0 () **Belay:** ★ 0 ()

Spécialités:

Matériel:

Cordes: 1x30m

Résumé: (traduction alternative)

Hiking and swim canyon.

Hydrologie: (traduction alternative)

Water level: <http://canyoning.pirineos-pyrenees.eu/barranco/5>

Accès: (traduction alternative)

We drive north on the A-138 from Ainsa in the direction of Bielsa. After 10 km (from the center of Ainsa) we cross the Rio Bellós and then pass through the village of Escalona. 350m after the bridge we turn at the traffic circle in northwestern direction ("Fanlo" - "Anisclocanyon") on the HU-631. We drive always along the river (Rio Bellós), we come into the canyon, the road leads partly high along the wall and after 13,2 km we come to a bigger parking area in a hairpin bend to the left. Here we park our (possibly lower) car.\nHere is also an alternative approach on better, especially wider road. For this purpose, 1.9 km after the mentioned traffic circle in the north of Escalona, we turn left on the road to Buerba and Vio. We first drive past the campsite and then 12 km up to Buerba. Past the village, up over the saddle (with a beautiful view into the Anisclo canyon) and beyond in sepentines downhill. 4.4 km after Buerba we meet HU-631 at an acute angle, on which we turn right (in a southeasterly direction). If we have only 1 car available, it would be recommended that all but the driver get off here (including luggage) and let the driver continue alone to the aforementioned parking lot in the hairpin bend. The driver will come to this parking lot after 1.6 km.\n\nFrom the parking lot we now go - with a second car or on foot - (again) up the HU-632 - there is also a shortcut of the wide road loop on a footpath in the direction WNW uphill -, after 1.6 km you join if necessary with the group of those dropped off here and it goes another 800m to the bridge over the side stream - Barranco Flageto/Metils/Malaguero. Here we can park our second car, if we have one available.

Approche: (traduction alternative)

The entry is most useful via this side stream, see description there,

Alternatively, we continue on the road for about 100 m, then turn right onto a path (sign "Sercue") that leads down from the road in a northerly direction to the Puente de la Espucialla over the Rio Aso (Viandico) - entry.

Tour: (traduction alternative)

First - at least in summer - dry canyon, then abundant water flow due to a karst spring. A few rappels that can usually be jumped.

Retour: (traduction alternative)

At the exit of the tour we come to the Cascada d'Aso and a footpath that crosses here the river in the direction of Anisclocanyon. You can now exit here above the waterfall on the path to the right or you can still rope down - also a jump is possible - into the narrows. At the exit of the pool you climb up to the right on the mentioned footpath and walk up to the road. Here you turn right to the car.
