Difficulté: moins difficile	Niveau: v3 a3 III	Temps total: 3h35
Temps approche: 1h	Temps tour: 2h30	Temps de retour: 5min
Altitude d'entrée: 450m	Altitude de sortie: 280m	Altitude du delta: 170m
Longueur du canyon: 1200m	Rapelle le plus haut: 25m	Nombre de rappelles: 12
Transport: à pied	Type de roche: limestone	Zone de prise d'eau: 9.00km ²
Saison:	Orientation: Sud-Est	Meilleur moment:
Évaluation: ★ 3.4 (11)	Info: ★ 2.4 (8)	Belay: ★ 2.8 (9)
Spécialités:		
Matériel: Cordes: 2x30m		
Résumé: (traduction alternative) Varied lime canyon; several slides/possible jumps; exposure south/east; approx. 30m grotto with beautiful sintering (lamp not absolutely necessary); water at times somewhat turbid due to vegetation; nice 12m slide; several slippery spots; protection good (10mm Inox); several possible jumps.		
Hydrologie:		
Accès: (traduction alternative) From Domaso head south until you reach the town of Leno. In Leno, take the first road on the right up Via S. Pellico (signposted "Santario dell Soccorso"). Immediately after the fork, keep left and follow the road uphill. At a crossroads keep right and continue uphill until you reach the church "Acquafredda" with a large parking area. Alternatively, choose the parking area at the exit to avoid having to walk back to the higher parking area in neoprene.		
Approche: (traduction alternative) From the parking lot near the church, first follow the paved mountain road "Via S. Benedetto" steeply uphill. After about 20min. there is a fork with a yellow arrow on the left. Here you leave the mountain road and follow the path/trail marked yellow on trees and rocks to the left above the canyon. After about 15min. the path leads to an abseil point attached to the tree into the stream.		
Tour: (traduction alternative) The Perlana inferiore is a discontinuous lime canyon rich in vegetation and mostly open, with several short rappels or possible jumps and slides. Between the steps, especially in the upper part, there are always shorter walking and downclimbing steps (some with small creeks). A beautiful 12m slide in deep pools and a small dark grotto with sintering in the middle of the canyon are the highlights of Perlana. Unfortunately, the grotto was completely clogged at the top at the actual rappelling point into the grotto during our ascent. However, a visit from below was possible. The canyon is also used commercially and is very popular due to the south/east orientation and several jumps and slides. There are several escape/entry points in the canyon. Normally, you get off to the right before the bridge, because after the bridge there are three rather uninteresting rappelling points (16m, 14m, 18m).		
Retour: (traduction alternative) Get off before the bridge on the right-hand side (private left). Then cross the bridge and follow the road to the left up to the church/parking lot (steep shortcut over cobblestones possible). Alternatively, continue in the river till the bridge of the road and exit right after the bridge following a water pipe.

Automatisch importiert von Descente-Canyon.com für Canyon Perlana Nous sommes entrés par l'affluent rive droite (Torrente Chisola) où nous avons remplacé la corde du relai de la première C30. La suite de Perlana est très jolie et ludique, mais attention au T10, il y a un arbre coincé sous l'eau à l'arrivée (ça passe peut-être mais on a préféré éviter). On a terminé avec les 3 dernières cascades après le pont, qui sont équipées. Par contre la sortie en bas est galère ! Une sente monte RD 20m après la dernière cascade mais passe sur une propriété privée. L'autre option c'est la déchetterie... Pour le parking, celui Via San Rocco est parfait. Never difficult creek with some really aesthetically remarkable passages, unexpected in this place, evidently very busy so the weapons are all good, we also found some fixed ropes (traduction alternative)

Automatisch importiert von Descente-Canyon.com für Canyon Perlana Pas trop compris le 4h de parcours. On a mis 1h40 sans se presser en démarrant au bon endroit (bien suivre le sentier qui se perd un peu jusqu'aux mains courantes) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2999/observations.html>)

Beautiful single sections. The last 3 waterfalls are also worthwhile. Then directly left in the forest steeply up or right over walls out and on path between houses up. (traduction alternative)

2025-06-14 | Peter | ⭐⭐⭐⭐ | 📖⭐⭐ | 📌⭐⭐ | 🌊 Haut | 🟢 Terminé

Entered Chisola Creek and descended to the bridge. The high flow at this time did not cause any problems. Very beautiful environment! (traduction alternative)

We had a training day here focused on efficiency. The canyon can be approached in several ways. We followed the route on the left bank. We followed the path on the map up to the gorge. This path is quite exposed in some places. At the end of the path, there was a rope around a tree with a maillon. We descended from there and ended up in the canyon. We completed the entire canyon, including the last three waterfalls, in just under an hour and a half.
