Pays: Italia / Italy Région: Friuli Venezia Giulia Sous-région: Udine Ville: Carnia		
Difficulté: difficile	Niveau: v5 a3 IV	Temps total: 2h20
Temps approche: 10min	Temps tour: 2h	Temps de retour: 10min
Altitude d'entrée: 420m	Altitude de sortie: 270m	Altitude du delta: 150m
Longueur du canyon: 300m	Rapelle le plus haut: 40m	Nombre de rappelles: 9
Transport: Voiture facultative	Type de roche:	Zone de prise d'eau: km ²
Saison:	Orientation: Nord-Est	Meilleur moment:
Évaluation: ★ 4.5 (45)	Info: ★ 2.9 (37)	Belay: ★ 2.9 (42)
Avertissements: <i>Accès fermé à certaines heures</i> Attention : l'accès au parking d'entrée du Rio Lavarie dans le Frioul est fermé jusqu'au 1.10 aux heures indiquées ! Pour les détails, voir l'image.		
Spécialités:		
Matériel: Cordes: 2x50m/1x20m		
Résumé: (traduction alternative) Short, but versatile canyon with a piece of dark gorge, washed out rock, some possible jumps and easy switchbacks. Highly recommended beautiful lime canyon; rappel mostly in the watercourse; exposed belays; rappel points not always visible; clean water; beautifully polished limestone; 2 variants possible; be sure to check the water level at the last rappel point before the tour; from noon you have the most light in the canyon.		
Hydrologie:		
Accès: (traduction alternative) Coming from Carnia, take the SS13 in the direction of Tarvisio. About 1,5 km after the Hotel Carnia, at a left turn (km 172) and after the brown sign "Moggio Udinese" you will find on the right side a parking possibility at the exit of the canyon. . You can shorten the access by taking a second car to Stavoli Ravorade. With the second car you go back towards Carnia (Udine). After the traffic junction at Carnia, cross a bridge with tracks underneath. Shortly after, you should turn left towards Tugliezzo, but this is not possible because of the barrier line, so you have to turn right towards Carnia. At the exit turn right and follow this road stopping on the left (goes under the SS13 road) at the crossroads go straight on towards Tugliezzo. An asphalted road winds up next to the huge gravel field towards the few houses of Tugliezzo. After the houses on the plateau, the road descends with a sharp bend to the right, passing a barrier and the bridge that crosses the Rio Lavarie. For the Rio Lavarie it is best to park the car after the bridge at the left gravel place. If you want to go the right tributary (Rio Barbar) of the Lavarie so you look a little further up just before another bridge, where there is a large boulder field (strong left bend), a parking possibility.		
Approche: (traduction alternative) At the barrier on the left side of the road begins the descending path which you follow to the streambed (old bridge wall)--> entry at approx. 450Hm. If you want to get on foot, cross the Rio Lavarie on the cycle path. Immediately afterwards, follow the lush red color markings to a power pole (steep), then even steeper over footprints up the ridge until you stand in front of a rock face with a chain and step clamps. Climb up here and continue steeply to the ridge. Turn left on a fairly good path until it is overgrown, just before this turn diagonally left following the footpaths and cairns to the normal access path to Lavarie. 30-40min		

Tour: (traduction alternative)

Arrived at the streambed, after a short walking passages you come to the first step that can be downclimbed on the left. After that, in a narrowing canyon, comes the 1st short rappel point followed by a not visible about 35m high rappel point which is best reached via a removable traversese rope left. After this rappel point, the mostly incised part of the canyon begins. Small twists, steps and a 5m rappel occur in this part. At the end of the 100m narrow section, the canyon opens again briefly. You come to a 5m step that can be rappelled or slid. Here you also meet the right tributary Rio Barbar. Continue with rappel in the water stream, first 15m left, then about 10m right. After that you have several possibilities to rappel. In case of strong water flow you should stretch a traversese rope across the chute to the hidden piton on the left side, then rappel outside the water flow for about 30m to the lower chain anchor on the right. From the chain anchor it goes without visual contact, either 25m to the right intermediate belaystation or a good 40m to a belaystation on the left with a traversese rope (! the traversese rope together with the bolthook is often destroyed by the water). The final rappel on the left has about 30m or on the right from the intermediate belaystation about 40m. After the final waterfall you walk a short distance along the streambed to a large rock step which you climb down on the right. After the 1st bridge the tour ends at about 270Hm.

Retour: (traduction alternative)

Before the 2nd bridge you climb right out of the streambed. In a short time you will reach the parking lot.

2025-08-28 | Federico | ★★★★★ | 📖★★★★ | 🚣★★★★ | 🌊 Normale | 👍 Terminé

Beautiful canyon! Crystal clear water!!! Perfect anchorages!!! Left car at exit, 40 min for walking up, very vertical trail. Must do!!! (traduction alternative)

2025-08-25 | Péter Bonczi | ★★★★★ | 📖★★★★ | 🚣★★★★ | 🌊 Normale | 👍 Terminé

TOP! 2 people hiked. The road to the upper parking lot was not closed today. We left the car in the upper parking lot. . after we were done I went back for the car on the route recorded on the OSM, which is very precise and easy to follow. Without a backpack, it took me 25 minutes to hike to the upper parking lot. (traduction alternative)

2025-08-23 | Alfredo | ★★★★★ | 📖★★★★ | 🚣★ | 🌊 Faible | 👍 Terminé

All correct.nice canyon.Thanks to canyoneast (Sebas and friends) for sharing activity and car combination.t (traduction alternative)
