Alpine canyon that changes again and again. First very narrow and small steps, then a large open rappel, then a run with individual sections, and finally another incised passage with 10m rappels.

Hydrologie: (traduction alternative)
Only feasible at the exit of summer or beginning of fall, water level is never deep as it always seeps in through the scree.

Not really slippery like previous comment. All anchors ok but only one anchor per pitch even in the big one.

Very slippery at the moment, otherwise a canyon worth seeing. When it's not narrow, you have a beautiful view of the 4000-meter peaks of the Alps opposite. (traduction alternative)
