Altitude d'entrée: m	**Altitude de sortie:** m	**Altitude du delta:**
Longueur du canyon: 400m	**Rapelle le plus haut:** 25m	**Nombre de rapelles:** 6
Transport:	**Type de roche:**	**Zone de prise d'eau:** km²
Saison: janvier - décembre	**Orientation:**	**Meilleur moment:**
Évaluation: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Spécialités:

Matériel:

Résumé: (traduction alternative)
Gully with little interest, quite dressed, although it does not bother to advance.
There is the option of combining cars but the combination is long, but the way back is very nice, a discovery.

Hydrologie:

Accès: (traduction alternative)
We are on the C14 between Coll de Nargó and Organyà (direction Seu d'Urgell), soon we have a detour to the right on the L401 towards Figols I Alinyà.
Cross the bridge and continue to the right towards Alinyà until pk 4 where we will see a track on the right where we could leave the car to return.
With the access car we continue along the road passing through the villages of Perles and Alinyà to head towards Llinars. We will enter the village and continue up the cemented track towards Cal Gepet, after passing it we will arrive at a crossroads under a tank, we will take the track on the left. After 300m there are two tracks, a place to park.

Approche: (traduction alternative)
Take the track on the right, heading north to enter some meadows where we will see the watercourse of our descent, just follow it to the first rappel.

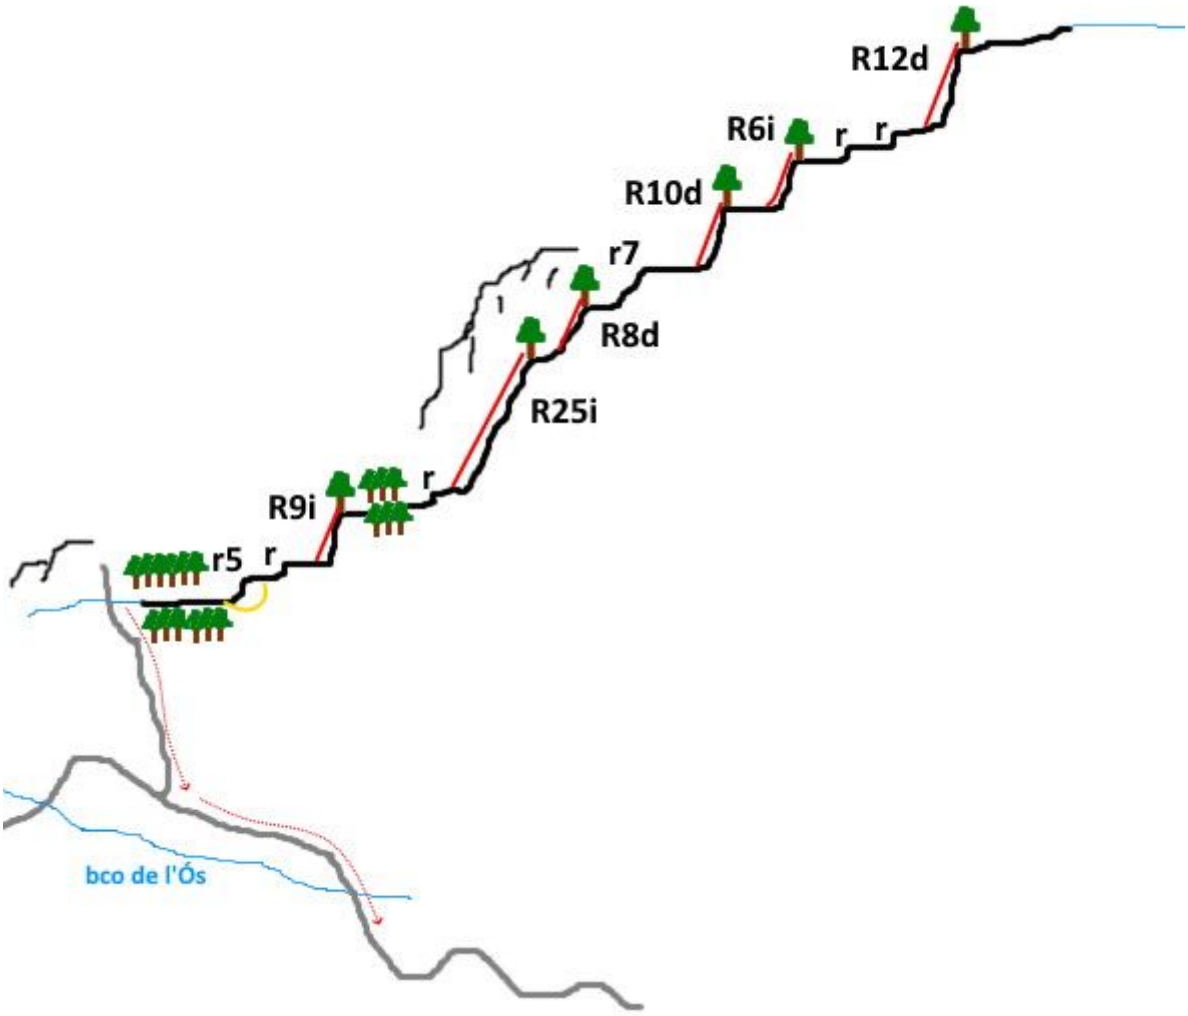

Tour: (traduction alternative)
Quite a dressed descent, almost all the rappels are more or less steep and without big formations.

Retour: (traduction alternative)
After the last rappel, there are a couple of drops and a track that we take to the left towards Bco de l'Ós. Shortly before arriving a track crosses us from south to north. We will take it in an ascending way to go up the torrent until its head where it turns to the east to go to Llinars, very wooded zone the head but we should not have problems in following the track in the different crossings towards the town.
