Résumé: (traduction alternative)
They are two canyons in one, we will access by the always dry and vertical torrent of Garx to go down to the Bolulla river and make the Pas Tancat. A spectacular setting, very good rappels and impressive straits, make these ravines a must in the province.
Caution if the Bolulla river carries water, because in the area of the straits we could have problems.

Hydrologie:

Accès: (traduction alternative)
We must get to Callosa d'En Sarrià. We have several alternatives.
From Benidorm we will take the CV70 towards La Nucia. When arriving at La Nucia we will continue by the CV70 to Polop and from here the CV715.
From Altea by the CV755 we will also go directly to Callosa.
From Callosa we take the CV715 towards Bolulla, we cross it following the road to Tárbena and after the pk 46 we will see a very sharp right curve. There is a track on our left that goes up the Bolulla river on its orographic left.
At one kilometer the road crosses the river bank by a bridge, here we can leave the car to return.
If we have two cars, with the access car we continue along the track up to the pass, or almost, that the asphalted part ends.

Approche: (traduction alternative)
With a car we will walk along the track to climb the hill taking advantage of the existing atroches.
From the pass, in both options, we continue along the track walking about 300-400m to a path that goes off to the right and down the watercourse to the source of Garx (trough). From there we must head towards the riverbed until we reach the beginning of the descent.

Tour: (traduction alternative)
The first part of the descent is the torrent, very spectacular for how it plunges into the Bolulla river. Its 30m rappel is a delight.
The second part is the descent of the Pas Tancat itself, very narrow, closed, spectacular. It is easy to imagine how this narrow part of the river must be when it is flooded.

Retour: (traduction alternative)
Along the riverbed to the bridge
