**Accès:** (traduction alternative)
We drive north on the A-138 from Ainsa in the direction of Bielsa. After 10 km (from the center of Ainsa) we cross the Rio Bellós and then pass through the village of Escalona. 350m after the bridge we turn at the traffic circle in northwestern direction ("Fanlo" - "Anisclocanyon") on HU-631. We drive always along the river (Rio Bellós), we come into the canyon, the road leads partly high along the wall and after 13,2 km we come to a bigger parking area in a hairpin bend to the left. Here we park our car.

**Approche:** (traduction alternative)
From the parking lot, a footpath leads down to the San Urbez bridge, where you can take a look at the lower parts of the Rio Bellos. Then it goes into the Anisclo Canyon and up to a point indicated on signposts as "La Ripareta". Here the Barranco Pardina comes down from the orographic right side. From here you path into the river.

**Tour:** (traduction alternative)
Up to 30 rappel. Pretty much at the beginning the river notches abruptly about 20 m deep and we come through under a massive natural arch. Then running sections alternate with rappels and swimming sections. Due to the north-south orientation of the canyon, the pools show a true blaze of color in the sunlight. Possible jumps again and again. As the tour progresses, the walks get longer and the drops less. Then you also meet hikers and bathers.

**Retour:** (traduction alternative)
At the latest there, where the path we walked in the approach crosses the river, we get off to the left and come back to the car on the approach path.
