Résumé: (traduction alternative) Attractive jumping and rappel canyon with warm, green water.		
Hydrologie:		
Accès: (traduction alternative) From Dolceacqua drive up the valley in the direction of Rochetta Nervina. Park in the large parking lot in the village (2023: 8 euros per day, 1 euro per hour, free for motorhomes at night). Water tap at the sanitary building/back wall. Shower in the sanitary building - only open during the day.		
Approche: (traduction alternative) Cross the stream and on the other side of the village follow the signs to a mule track ("Sentiero 13"). Follow the path for 35 minutes to a signposted junction and take the lower path. You soon cross the landslide zone with two large rock debris below the path and then reach the entry point at the Ponte Cin bridge. Fee for ascent - 2023 collection hut was not yet occupied at 08.45 h.		
Tour: (traduction alternative) Entry is at the bridge over the stream. Here you can jump directly to 8.6m (descente). In the following, jumps up to 12m and small, well-equipped rappels up to 10m alternate. In the lower third there are wonderful tuff formations similar to the Maglia. After a rappel between huge boulders, the canyon opens up. The last point is the jump from the dam wall. Bathers are often to be found here. Watch out! There is a place (picture 12 shows it from below) that is often used by commercial operators to build ropeways. There is a VERY well-equipped belaystation on the left which is only moderately suitable for rappels as the rope tends to get stuck in a crevice here. If you are rappelling, then rather orog. right a little further ahead. You can jump at this point, but it is essential to check out the spot carefully. The pool looks much deeper from above than it is and is full of large stones. The water level can best be assessed at the entry. There are no obvious canyons in the critical part of the canyon. The "signposted" emergency exits described by descente are non-existent. In some places, the slope can certainly be climbed with difficulty on the left. There are plenty of places to get out of the water.		
Retour: (traduction alternative) Quite laborious through the blocked streambed until you reach a bathing area below an artificial step. Turn right here on a good path back to the village.

Automatisch importiert von Descente-Canyon.com für Canyon Barbaira (aval) On a fait l'intégrale. Nous sommes partis du pont di Pau, ce qui permet de s'échauffer et de s'émerveiller crescendo. Il y avait de l'eau mais ce n'était pas fou : le débit n'était pas incroyable, il n'y en avait pas tant que ça. Il manquait un petit truc ; certaines falaises en mousse n'étaient pas en eau, c'était assez sec. On n'a pas sauté du pont. Sinon, on était seuls dans le canyon et il est vraiment incroyable. Automatisch importiert von Descente-Canyon.com für Canyon Barbaira (aval) Tous les sauts et toboggans habituels passent mais les vasques sont plus engravées que les années précédentes. Il faut bien fléchir à l' arrivée (salut du pont au départ et saut de 10 mètres) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/20522/observations.html>)

We got in at the alternative entry (580m). This part has many walking passages, with few slides + jumps (because pools are filled). Scenic and worthwhile together with the lower part. 1 rusty 8mm anchor that could be replaced. Barbaira inferiore beautiful and very rewarding. At the exit there is now a lovingly furnished store, which invites you to linger after the effort with drinks and snacks. (traduction alternative)

Really nice, equipped almost all with resinati with at least 3 possible rappel lines, the final bottleneck is really spectacular, (traduction alternative)
