Résumé: (traduction alternative)
Nice spring ravine or heavy rains that if we take it with good flow gains many integers. It is also combinable with others in the area in a picturesque and lush environment.
Info from Alexis: LET'S BE RESPECTFUL WITH THE ABROADING FARMS DO NOT ABANDON THE CANYON.

Hydrologie:

Accès: (traduction alternative)
Once in Trevélez, follow the road towards Almería up to kilometer point 36, cross the riverbed and on the right after the bridge there is room for several cars (not next to the bridge, private property).

Approche: (traduction alternative)
Situation bcos los Castaños, los Alisos and la Bina
Once parked the car of the exit we will undo the way by the road towards Trevélez looking for the kilometer point 35, to our right we will see that the beautiful communal way is born that in a smooth ascent crosses the irrigation ditch of Cástaras. With the utmost respect and without entering it we will follow it until we reach the confluence with the ravine of the Castaños, the first channel that crosses it, if the ravine already has flow before the irrigation channel, we are in luck.

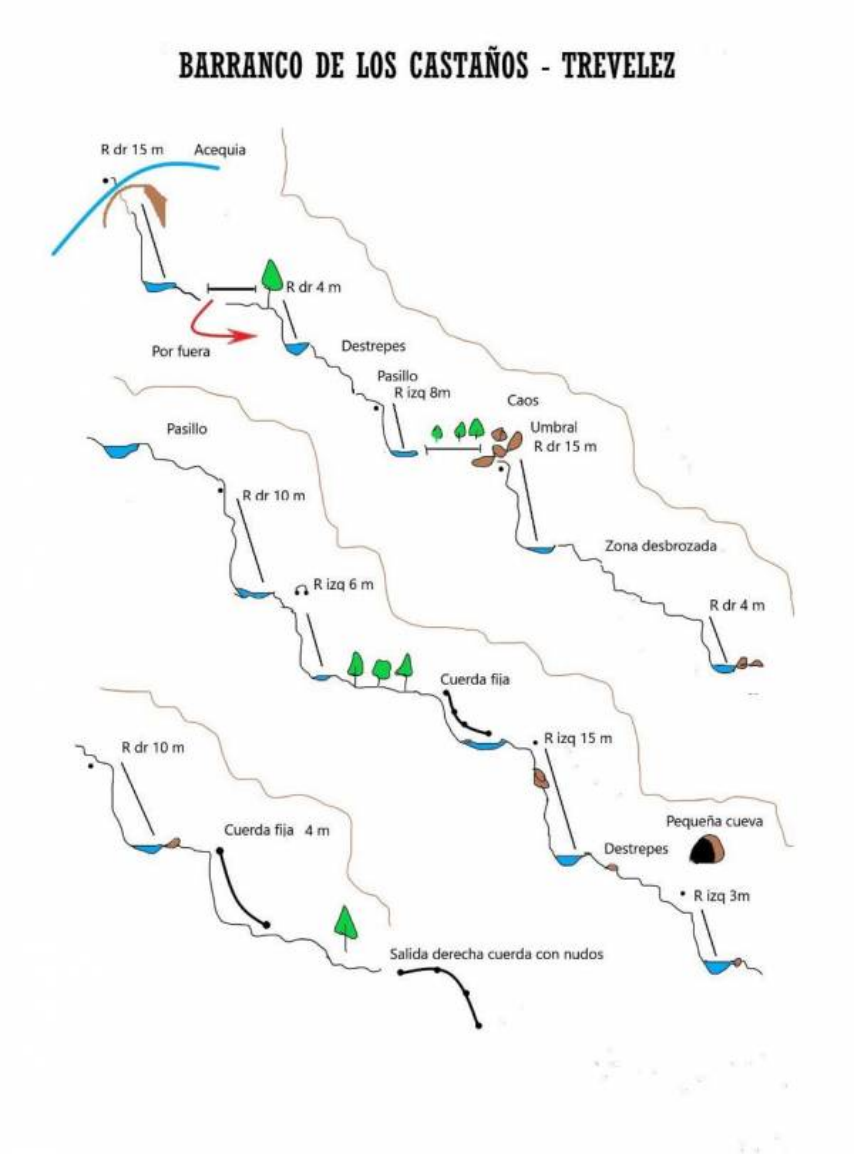

Tour: (traduction alternative)
Once changed we have a single point to safely reach the first rappel R15. Once down we will avoid by the orographic right a vegetation plug and immediately with a natural we will return to get into the river to not leave it any more, from here everything is continuous until arriving at the bridge.

Retour: (traduction alternative)
There is an exit before the bridge that, although it is more comfortable, can generate conflicts. It is better to get to the bridge and exit to the right with the maximum possible respect for the gates and fences.
