Résumé: (traduction alternative)
Short rappel and walk canyon with grotto

Hydrologie: (traduction alternative)
You can check the water level at the bridge near the parking exit.

Accès: (traduction alternative)
From Riva di Garda on the northern shore of Lake Garda, take the SS 240 toward Storo and Lake Idro. Pass Lake Ledro; turn right at Tiarno di Sotta and park a car at the road junction by the stream (about 20 km from Riva). Take the second vehicle—or walk—up the narrow road on the orographic left slope of the Massangla into the Val di Croina (hiking trail 415). After about 1.5 km, the road crosses the stream. Parking is available on the other side of the bridge.

Alternatively, you can park earlier at a bend near a large stone cross on the right side of the road. From here, you can descend steeply to the left and skip the running route, allowing you to reach the grotto directly.

Approche: (traduction alternative)
Go back about 100 m along the road and take the mule trail to the right down to the stream. Alternatively, rappel into the stream at the bridge.

At the alternate entry point, head left down a steep slope into the streambed.

Tour: (traduction alternative)
Only 3 rappels, one of which leads from the cave through the jet of water out into the open.
Nice at the start from the bridge, then some scrambling and a few small slides and sections requiring downclimbing. The final section goes through the cave. There’s an emergency exit in front of the cave; the section leading up to it is open.

At the alternative entry point, you reach a fixed rope. This is usually not needed, as you can easily downclimb to the ground.

You arrive at the entrance to the grotto. Here, a fixed rope is strung up for a zip line. You glide beautifully through the jet stream here. This is immediately followed by the second rappel out of the grotto into the open.

After that, we’ve already reached the exit of the canyon.

Retour: (traduction alternative)
After the grotto, go out to the right and down the path to the car.

A very short but very rewarding canyon, with two rappels in the cave (traduction alternative)

Everything's great. It's very short, but the cave is an absolute highlight. Headlamp required... (traduction alternative)

Unfortunately, it's very short, but the cave is still a little highlight. (traduction alternative)

Chose the short version with an alternative entry point to avoid the Bachlatscher. Short route, 2 rappels in the cave. Totally worth it! The cable car is still in operation. A lot of fun! (traduction alternative)

A nice, short, and slippery route. There’s a long walking passage at the beginning before you reach the cave. There are plenty of fixed ropes, all in good condition, as are the belay stations. A headlamp is required for the cave! Inside the cave, a fixed rope is strung up for a zip line. There’s plenty of parking available at the entry and exit points. Rappelling down from the bridge (entry) makes the subsequent walking passages well worth it :) (traduction alternative)

Automatisch importiert von Descente-Canyon.com für Canyon Tiarno C'est mignon comme tout. Un saut. Quelques petits obstacles puis une belle grotte où la frontale est nécessaire. À faire. On n'avait pas de navette, du parking aval, on est redescendu sur la route puis on a pris à gauche jusqu'au pont de départ. Équipement excessif (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2528/observations.html)

Great short canyon, many fixed ropes, good stands, headlamp for the grotto at the end important because a rappel goes into the dark. The beginning is picturesque and mystical but a lot of walking. We rappelled once from the barrage (tree) and from the bridge as a little "treat". Short evening run, recommended for the grotto and scenic views alone. Very well developed, headlamp in the cave very helpful as almost completely dark, but also worked with the flashlight from the cell phone (traduction alternative)
