Résumé: (traduction alternative)
Beautiful stream. Strongly incised in places.

Canyon that was made a long time ago. It was refitted in 2021. With 80m of rope (exact length still to be checked) you can rappel directly from the bridge. (machine translated)

Hydrologie:

Accès:

Approche: (traduction alternative)
Either rappel directly from the bridge (about 80m), or walk down the steep slope. If necessary, rappel from trees.

Tour: (traduction alternative)
Not too exciting at first, lots of blocks to downclimb, but then it gets tighter and there are finally a few successive rappels.
At the possible intermediate exit via the Suone, there are more boulders again, but then comes another very nice part.
Then the canyon opens up and unfortunately there is another passage with blocks.
At the end it gets a bit more vertical, watch out at the rappel below the Bahn bridge is an intermediate pool which has a lot of white water!

Many short abseils.

Retour: (traduction alternative)
Turn right and walk down to the valley floor.

Water flow of about 150 l/s; some anchors are unusable because they cannot be reached, they are up to 3 meters high. We placed an anchor on river right at the first rappel. Five or six belay stations need to be fixed. The locations of the upstream and downstream parking areas are reversed (traduction alternative)

I like it very much, in several places spectacular corridors shaped by the force of water, not very difficult (traduction alternative)

We redrilled the upper parts, then we went out via the Suone because we had run out of anchors. You need an 80m rope to rappel from the bridge. (traduction alternative)
