Spécialités:

Matériel:
Cordes: 2x 40m

Résumé:
Nice stream, featuring very beautiful narrow gorge sections.

Hydrologie:
A water intake after the first rappels diverts almost the entire flow. The water is reinserted near the end, so at the exit you see the initial flow rate.

Accès:
Lower Parking: From Verbania, continue along the lake shore towards Cannobio on the SS 34. After about 2 km (at Km 16), near a residential complex, you reach the stream exit. Park along the road.
Upper Parking: Continuing along the main road, shortly after the parking area, turn left towards Susello. Continue along the road towards Cargiago. At a stop sign, turn left and park where possible near the bridge over the stream.

Approche:
From the bridge, locate the best spot to drop into the stream bed. Pay attention to private properties. An approach without a car shuttle is possible along the road, approximately 2.5 km.

Tour:
Only the first rappel after the entry might present some issues depending on the flow rate. However, it can be avoided with a rappel from a tree outside the main flow. Avoid in peak summer.

Escape Routes: The only possibility is at the water intake. Note: this leads onto a private road, featuring a gate and a caretaker to pass to reach the valley.

Retour:
After the last small jump from a weir, exit on the right to reach the road and the parking area.
