Matériel:

Résumé: (traduction alternative)
Or right tributary of Sant Romá, it is a generally dry ravine, dressed, with great views. The facilities are all in natural and the return we will be able to leave by the exit of Sant Romà but it will force us to go up it or to go down until the mine. Perfect to combine with its neighbors

Hydrologie:

Accès: (traduction alternative)
From Berga direction Puigcerdà by the C16, passing the swamp we have the detour to the left to St Corneli and St Josep by the BV4025, beautiful road of Berguedá that zigzagging goes up the mountain, between forests, acquiring better and better views over the valley. This area in autumn is simply a marvel of colors.
Access to Bcos Sant Corneli
Before km1 we will arrive at La Consolació, a place to leave the second vehicle if we do not want to go up Sant Romà.
We will continue to Sant Josep and before km2 there is a sharp right curve, a few meters before there is room on the left to park (exit Sant Romá).
With the access car we pass the km3 and a few meters the detour to the left to St Corneli, we will pass by the museum of the mines and continue along the road on the left, we leave the viewpoint on the left and 50m later we have a sharp right curve, in front there is a small road, place to park without disturbing.

Approche: (traduction alternative)
We will continue along the rock slope, leaving the building on our right to go down to the riverbed.

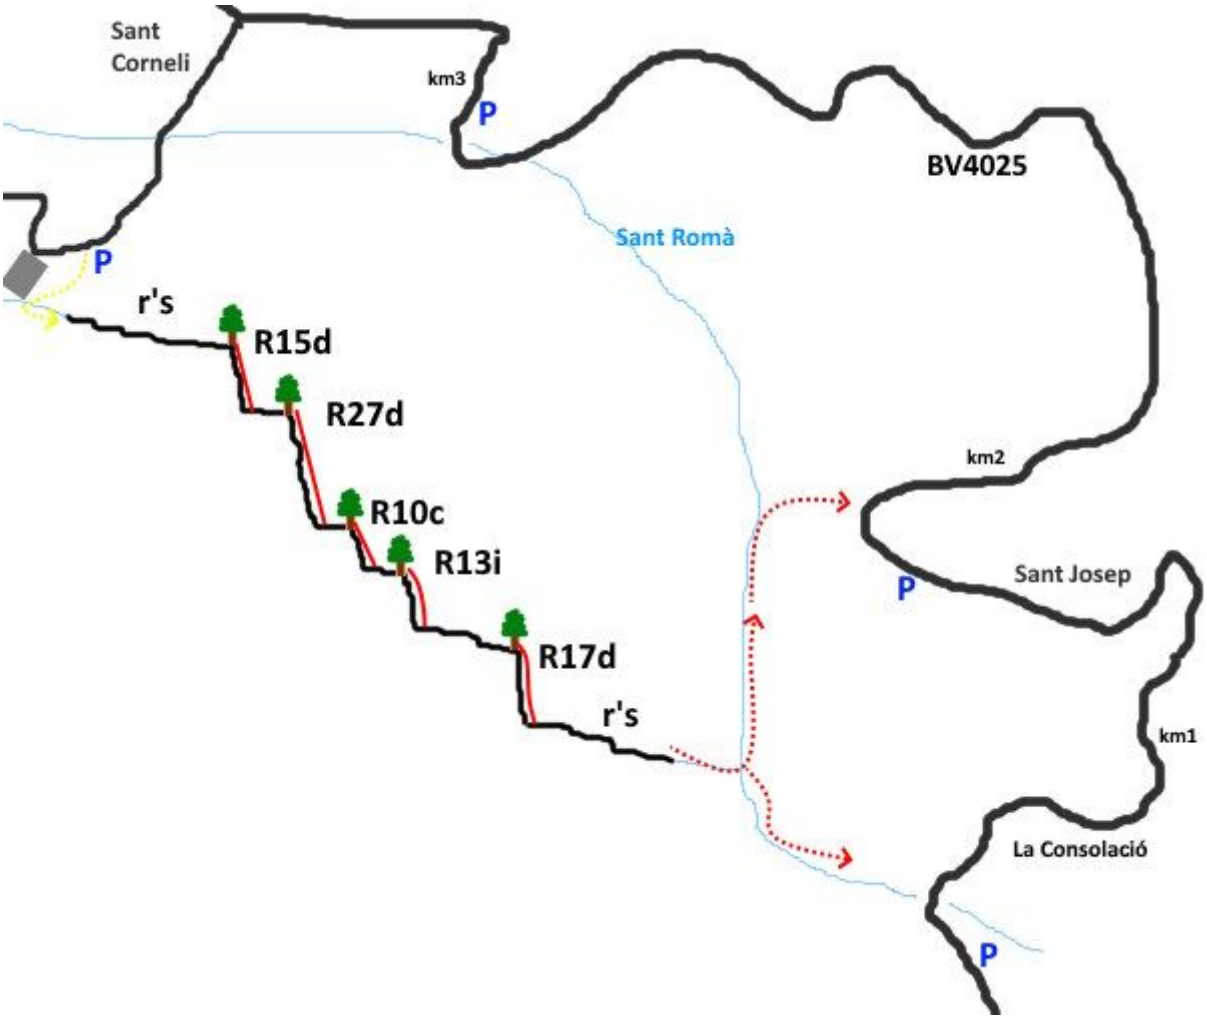

Tour: (traduction alternative)
Dry riverbed with steep slopes, lots of vegetation and quite slippery except in summer when it will be drier, little by little we approach the vertical and from here one rappel after another to reach the bottom of the Sant Romà torrent.

Retour: (traduction alternative)
We can go up the torrent to the exit of the bend or follow the riverbed down to the La Consolació mine.
