Matériel:
Cordes: 2x50m/1x20m

Résumé: (traduction alternative)
Beautiful lime canyon with clean water; short impressive canyon with 45m final rappel; several grottoes and deep pools; well combinable with Rio Val.

Hydrologie: (traduction alternative)
First part with water, but equipped accordingly. For the second, everything depends on the water intake at the dam. Correct level in summer.

Accès: (traduction alternative)
From Torbole --> Riva --> at traffic circle ri. Storno --> road ri. Albola mountain pass --> through small village --> past the lake (Lagodi Ledro) --> through village --> always straight ahead --> road crosses the stream (Palvico) --> entry r. at gravel turnout Km 47.5 --> to chute 2. Car over the curvy road down until in a left bend a stone with Km 50 appears --> here r. narrow road back to the picnic area (parking lot)--> here you can see after a short walking passages the last 50m waterfall and the actual amount of water. If you don't have a 2nd car there is the possibility to take a very steep path (orographically right) back to the upper parking lot after the tour on foot.

Approche: (traduction alternative)
Enter the creek right next to the gravel turnout at km 47.5.

If you choose the alternative parking lot and park in the hairpin bend, you descend briefly to the dam and enter directly at the weir.

Tour: (traduction alternative)
The tour begins with walking passages and climbing over large boulders. At a 3m step you will find a fixed rope for downclimbing. This is followed by 2 swimming passages with small slides in a narrowing canyon. Arrived at the grotto, the 10m step can be rappelled or slid. After the big pool in the grotto the canyon opens. Here you have the possibility to bypass the next 10m step via fixed ropes (right) up to an 8m jump (attention water depth!). After the jump (rappel) comes the weir with possible emergency exit.

This is the beginning of the lower part (see alternative canyon start).

On the left side of the wall is the belaystation for the 20m steps. Here you mostly rappel 15m and slide 5m into the deep pool. In the grotto, swim to the next 25m rappel (left or right). Enclosed by high rock walls follows a 6m jump into a large pool. Then there is a narrow 5 m gap which can be rappelled or climbed down. Now you are at the final waterfall (45m). Here you can rappel to the left outside the water or to the right in the water to the large water basin (a 60m rope is recommended for pulling off). After a short walking passages in the shallow streambed, at the end of the tour you can take a running jump of 6m from the dam wall into the last pool.

Retour: (traduction alternative)
Get off at the artificial step on the right and follow the path back to the metal bridge. Cross it and go back to the parking lot (shuttle car).

Coordonnées:
Départ du Canyon 45.8456 10.6016
Parking à l'entrée 45.8452 10.6008
Parking à la sortie 45.8429 10.5864
Fin du Canyon 45.8427 10.5931
Parking à l'entrée 45.8428 10.5947
Départ alternatif du Canyon 45.8431 10.5953

At the final waterfall, there is a ledge on the orographic right; according to a guide who leads the Palvico route, a 50-meter rope is sufficient there. (traduction alternative)

The jump in front of the water intake is covered with gravel; everything else is fine. We skipped the jump from the dam—it looked low, and we weren't sure about it. (traduction alternative)
