Spécialités:

Matériel:
Cordes: 2x50m

Résumé: (traduction alternative)
The upper part is not very rewarding. It is very slippery. The grotto under the bridge (primary access) is a very beautiful part of the canyon.
The tour is described below via entry via the Valle di Nota (from Aer).

Hydrologie:

Accès: (traduction alternative)
From Riva del Garda on the northern shore of Lake Garda on the "Gardesana Occidentale" - SS 45 approx. 23.5 km southwards, where the road to Tignale (SP 38) branches off at an acute angle. Follow this road uphill for 2.8 km until the road crosses the "Vione" (the stream is actually called Rio Sernifa) in a sharp right-hand bend. Park the lower car at the bridge. Take the other car uphill for another 4.2 km until the road to Gardola branches off to the left. Go through Gordola and at the northern end of the village turn left onto Via Panoramica towards Aer (571 m above sea level), pass this village on the right until you reach the exit of the tarred road. Park the second vehicle here.

Approche: (traduction alternative)
We continue on a forest path (compass hiking trail no. 251). This leads us downhill and crosses a stream (Rio Nota) after about 800 m - entry. You can also descend a little earlier on footpaths to the stream as soon as you see it. (00h 20')

Tour: (traduction alternative)
After a few small steps up this orographic left-side tributary, you reach the superiore Vione. Elsewhere (e.g., in “Gole und Canyons”), access from the orographic right side directly into the Rio Sernifa (Vione) is described. Shortly after the confluence of the Rio Nota (with several small slides and jumps) and the Rio Sernifa, you’ll encounter an approximately 9-meter-long bumpy slide. Immediately afterward, you can follow a trail to the left back up to the upper parking lot. The subsequent 8-meter rappel should only be attempted if the pool has sufficient depth (check!).
The lower part of the Vione (from the road bridge) down to Lake Garda is a pure rappel canyon (16 rappels, max. 45 m, some exposed access points, approx. 3 hours) with water that is, unfortunately, polluted—a risk especially when flow is insufficient in midsummer. Currently (2012), access is prohibited.
In the meantime, the municipality of Tignalga has enacted comprehensive regulations for access to the Vione, the main provision of which requires the payment of a fee (2012: 2 euros) at the tourist office (ufficio del turismo) in Tignalga.

Retour: (traduction alternative)
Immediately out onto the road bridge.

AIC meeting 2026 Done upper and lower part, leaving the lower car in the paid parking of Porto del Tignale and the upper car at the end of via Castagneto in Aer, where the road from paved turns to unpaved, with a stop on the way up to Tignale tourist infopoint to pay the 2€/person mandatory fee and exposing the receipt on the parked car. Low flow, all the anchor points in order. The best part is the lower one where the canyon becomes narrow.

ATTENTION: Hikes must be registered in advance with the Tignale Tourist Office (info@tignale.org or by phone at 339.1251674). We were "caught" by the police at the parking lot and had to pay a 50-euro fine. (Actually, it would have been 50 euros per person, according to the police.) The supposed inspection fee upon registration is 2 euros per person. Anchors, fixed ropes, etc.—everything is in good condition; it’s a beautiful route, though there’s not much water at the moment. Automatisch importiert von Descente-Canyon.com für Canyon Vione (amont) Il y a bien deux bras. La branche sud qui commence à 650 c'est Vione et c'est sec avec de beaux passages dans du rocher très compact. La branche nord c'est l'affluent qui ramène l'eau et probablement le bon départ. À partir du sentier à l'altitude 530 environ c'est la partie des guides, suréquipée et ludiqueAccès par Piovere et le canyon sec tout croupi puis la partie classique en 3h40 environ. La partie sèche doit être un super plan après des pluies (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2612/observations.html)

Alke anchors in order. The first jump (approx. 12m) is not possible, but otherwise everything works with a bit of leg pulling. (traduction alternative)
