Résumé: (traduction alternative)
Relatively easy descent, with water, granite, good waterfalls and enviable surroundings. A descent not to be missed and much less with good flow, but beware! in that case we must be extremely careful in narrow areas.

Hydrologie:

Accès: (traduction alternative)
We are located in Bera on the N121A, direction Irún. Shortly after leaving Bera we have the service road on the right, we take it and continue to the 90 degree bend on the left, just at the p.k. 67.
We park here next to an old bar.

Approche: (traduction alternative)
After the restaurant, on the orographic left of the river, we have a path that climbs through the forest in zigzag, very nice and quite losing, to a track (it will take about half an hour).
Another option is to go down the road about 350m to a track that comes out, a few meters to get into the left and climb it about 100m to another track that comes out on the left halfway up the slope. This track is the one that we will go to stop by the path.
In both cases following the track until almost the hill, from here it descends towards the valley, here we already sense the stream below and as the most canyoned and vertical area we are leaving behind. Moment to leave the track and go towards the riverbed.

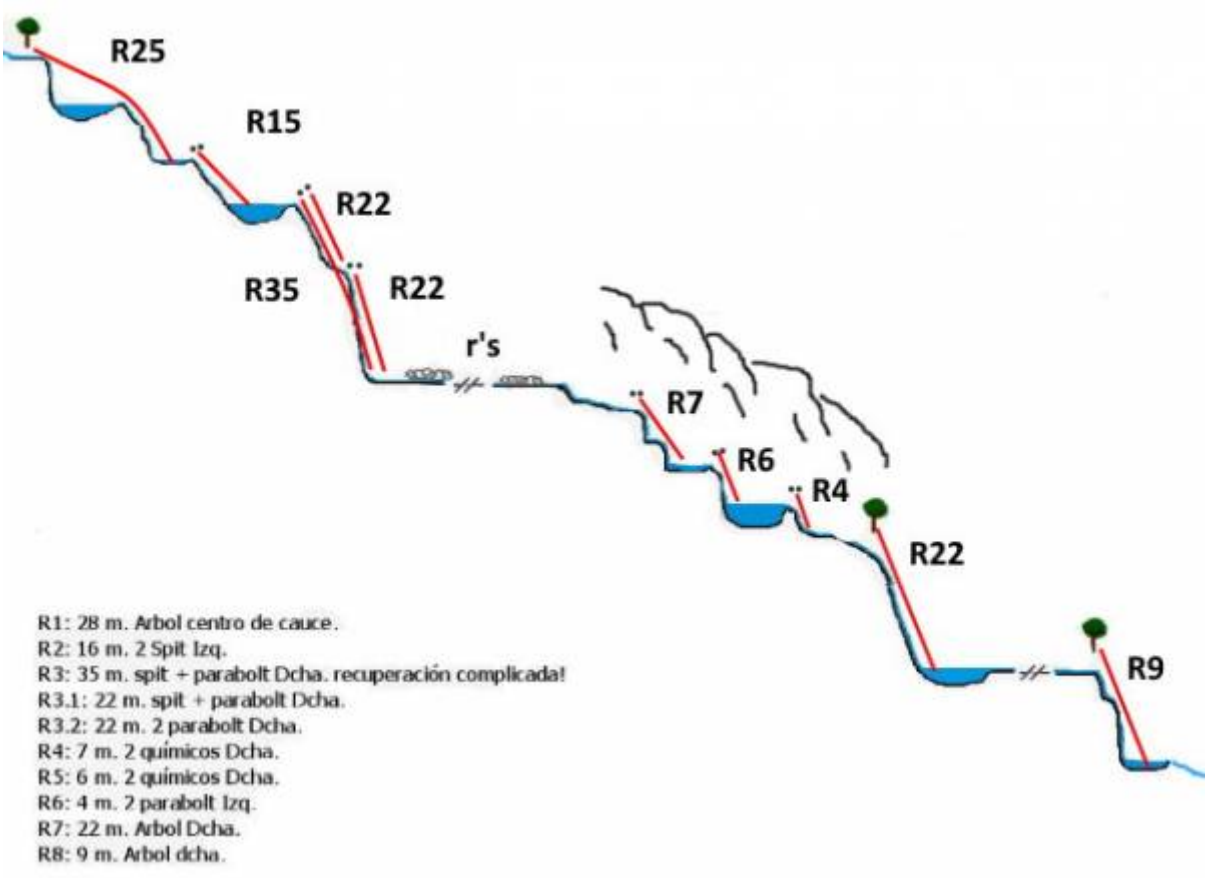

Tour: (traduction alternative)
A first rappel ramp from a tree to get into a "vertical" of 4 waterfalls, the last 35m is split by the difficulty of recovering the ropes.
We will continue through an area of climbing and walking, more open, where we will enjoy the landscape, the forest and the strange rock that makes up our canyon.
We enter the narrowest part, where we must be careful if the flow is high. Four rappels, the first three short and the 4th in a beautiful waterfall of 22m.
We will only have to walk a stretch until we reach the last rappel.

Retour: (traduction alternative)
We follow the river where we can make the best progress, we can make some dexterity and even slide to the old mining facilities. Here we will be next to the road.
