Résumé: (traduction alternative) A small but beautiful canyon. Ideal for practicing different techniques in the canyon, as there are many different stands within a short distance. The Torrent de Saint-Crépin can also easily be climbed twice in succession.		
Hydrologie: (traduction alternative) Usually only a small rinsal. Immediately after rain there can be a large amount of water with a lot of sediment, but only 2 hours after heavy rain there is an optimal amount of water with clear water.		
Accès: (traduction alternative) RN 94 between Embrun and Briançon, stop in the village of Saint-Crépin. Park near the cemetery.		
Approche: (traduction alternative) From the cemetery, walk uphill on the left-hand side of the river. Pass a water reservoir and follow a well-marked path in serpentines. Walk uphill to an altitude of 1250 meters. From here, leave the path towards the canyon by turning right at a green-marked tree. After a short walk between fir trees, a handrail leads to an abseiling point on a tree. Rappel about 15 meters, overhanging at the exit.

Remarks

Beautiful, sunny descent offering a lovely view of the Durance.

This canyon is still called "Torrent de Saint-Crépin".

Canyon rarely flooded; with an "unsurprising" amount of water (visible from the parking lot).

It is possible to take a shuttle bus up to the hamlet of "Le Villard". In this case, the approach time is replaced by a fairly "vegetative" river walk of about ten minutes before arriving at the canyon proper.

Retour: (traduction alternative)

Exit left via the small path.

Automatisch importiert von Descente-Canyon.com für Canyon Beal Noir Après une nuit et une matinée pluvieuses, le ruisseau a un débit correct. Celui-ci a toutefois déjà diminué lors de notre descente. Je ne comprends malheureusement pas les commentaires précédents concernant la qualité des ancrages. Le matériel utilisé est certes de grande qualité, mais le travail a manifestement été mal exécuté. Dans presque tous les trous, la quantité de colle utilisée est insuffisante, certains crochets dépassent nettement trop du mur. (<https://ig-klettern.org/2021/05/ammerthaler-wand-die-ursache-des-hakenbruchs/>). Et pour couronner le tout, le crochet inférieur du deuxième relais bouge. Tout cela pris ensemble, on ne peut certainement pas parler d'un équipement « très bien équipé », mais plutôt d'un équipement « nécessitant une rénovation ». PS : le relais pour le premier rappel n'est pas la sangle autour de l'arbre, mais le relais dans la roche en dessous, un peu plus en arrière. Immediately after prolonged significant rainfall. Initially a relatively high volume of water that was enriched with sediment. Immediately afterwards, the water was clear and the amount of water had decreased noticeably in the meantime. At first glance, the anchors appear to be "completely new, top condition", but there are technical errors in the installation of the anchors that not every renter recognizes and could still be dangerous. Automatisch importiert von Descente-Canyon.com für Canyon Beal Noir On a pris le sentier juste après la buse, signalé par un cairn. A part le premier rappel (anneau de corde sur AN), très bien équipé. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/20256/observations.html>)

3 times - 2 glue bolts on the 2nd abseil are lose.

The glue bolts on the second anchor are moving. Both of them.

Was nice to do with this waterflow. We went with a group, they got cold because of the high water. For beginners abseiling through the waterflow might be a bit scary.

From corner of the cemetery, walk uphill to point A on the map crossing the river and continue on the left-hand side of the river. Pass a water reservoir and follow a well-marked path in serpentines. Exit B to the corner of the cemetery, don't use this small (exit) path to enter the canyon. From point B climbing up is too steep and dangerous!
