Résumé: (traduction alternative)
Long integral descent with an easy part at the beginning - described here - and a more challenging II. Parts.

Hydrologie:

Accès: (traduction alternative)
From Corinth to Nestani and a little further uphill:
https://www.google.com/maps/dir/37.9135729,22.9065924/37.6276954,22.4915511/@37.7483637,22.5872762,11.56z?hl=

Approche: (traduction alternative)
Head downhill in a northerly direction until you reach the stream, as close as possible to the beginning of the narrowing.

Tour: (traduction alternative)
The descent begins in a narrow, increasingly deepening canyon. After 4 or 5 rappels, there is a marked exit option to the right (steel cable) or left (better right, as the path leads back here). This is followed by 5 more rappels, some of them higher, with certain technical requirements.

Retour: (traduction alternative)
A red arrow to the right shows the exit. Red dots mark the way to the path that leads back up.

Dry at the start untill a little stream from the side came in. The pools had lots of millipedes and frogs in them, on occasion some crabs. Even though there wasn't much flow the pools didn't really stink. Nice and narrow though not very deep. Feels like someone had too many anchors with them as they drilled this canyon. 50 m of rope was more than enough for this canyon, the highest rappel is less than the 26 m in the description. From the upper parking spot to the canyon in about 15 min, the upper and lower canyon combined just under 3 hours with 2 people, the walk back to the village 30 min.

Great canyon, if you're not disgusted by the thousands of millipedes. (traduction alternative)
