Résumé: (traduction alternative)
Torrent mountainous, very grassy, so much as to hinder our progress. Due to its source, under the Puig de Pastuira, it will always carry water, even if it is subject to periods of summer. Caution with the storms and periods of intense rains.

Hydrologie:

Accès: (traduction alternative)
We will take the C-17 to Ripoll, there we will take the C-26 and then the N-260 towards Sant Joan de les Abadesses, where a little more than a kilometer past the town we will take the C-38 to Camprodon.
Once in Camprodon, turn left at the traffic circle to Setcases and Vilallonga de Ter, on the GIV5264. Arriving at Setcases, next to the entrance traffic circle, we can park, there is a parking lot on the left.

Approche: (traduction alternative)
Accesses bcos Solans, Pastissol and Socarrats
Already equipped we will go to the village, entering by the main street to go up to the Plaça Major. Next to it we will find the indicators to the Camí de les Creus and les Mines, we will take it and we will begin the ascent through the mountain in comfortable zig-zag. After almost 2kms we will leave the track to go to the left to the remains of the mine, here the path becomes a little loser because it gets into the forest. As a reference, in this section we should not gain or lose practically no height. Once we arrive at the mine, we will continue horizontally looking to descend gently towards the riverbed of our river.

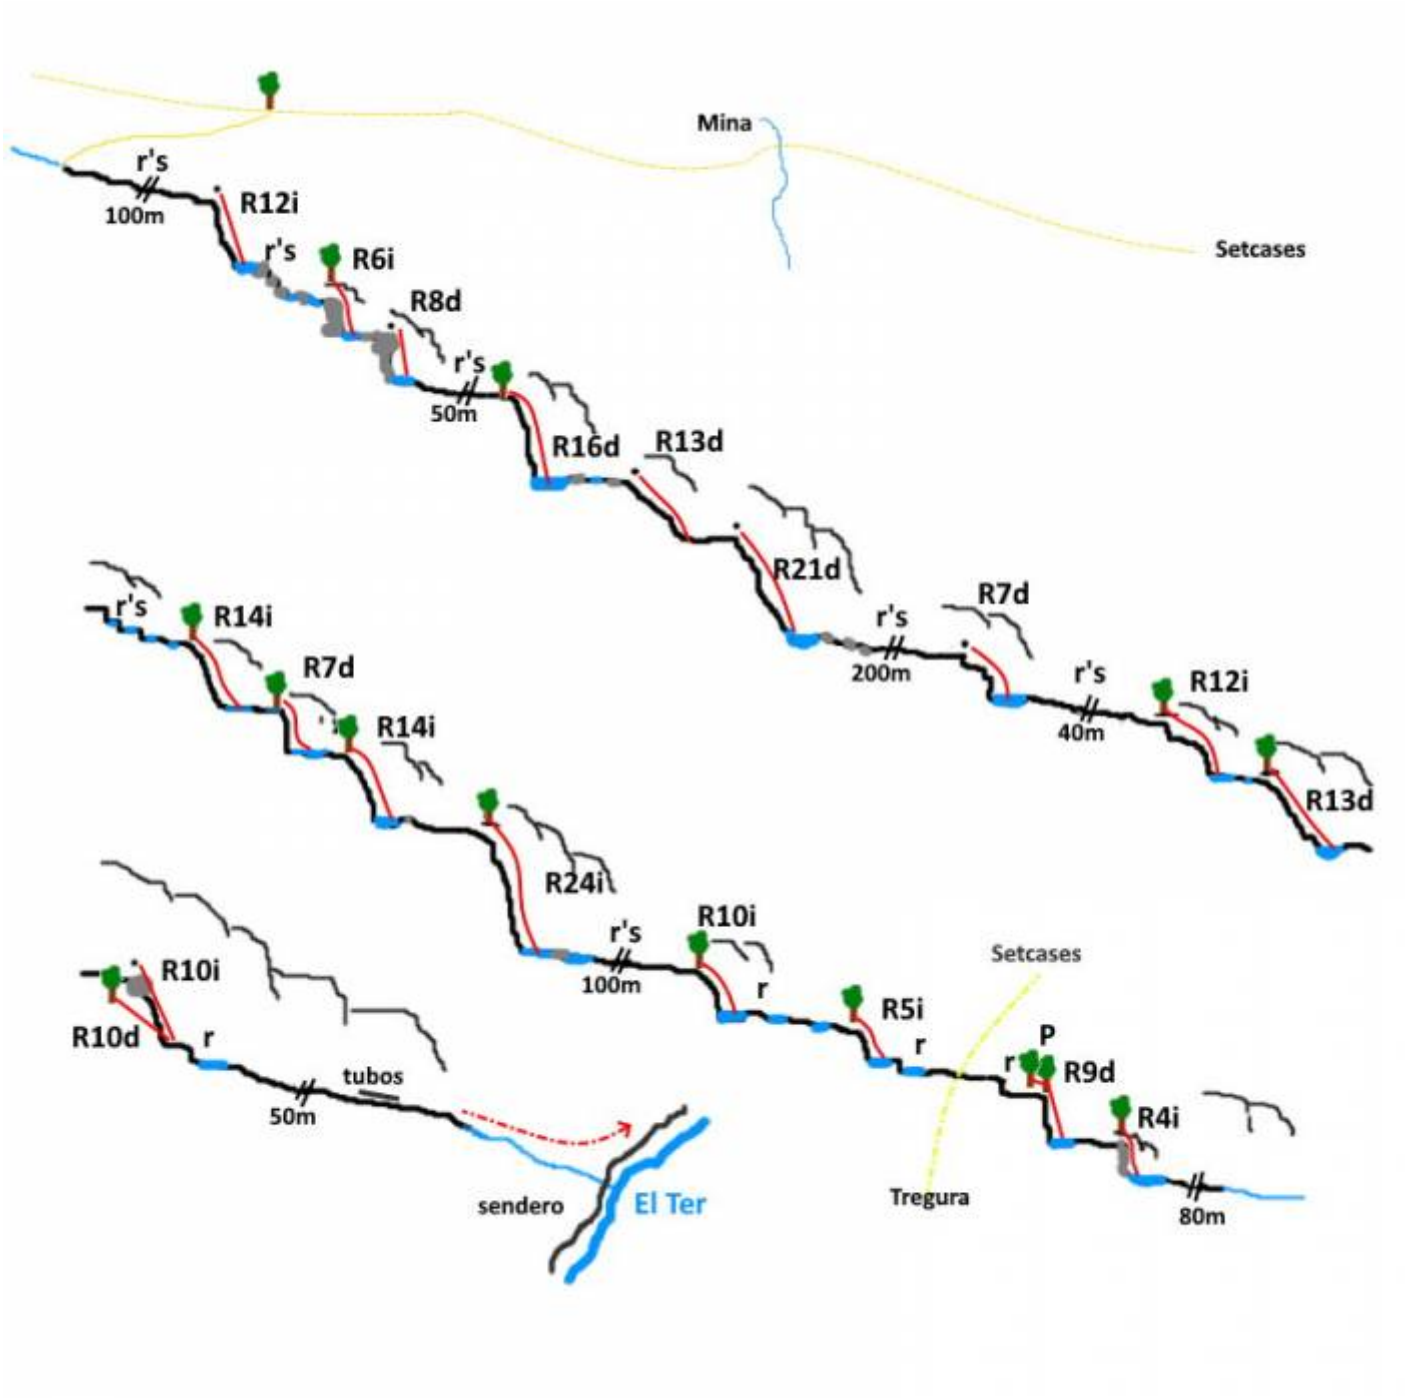

Tour: (traduction alternative)
Long descent with a multitude of abseilings and cliffs. At times we will find a lot of vegetation, remains of trunks, etc. that will complicate our progress. The pools that we will find are usually not deep enough to jump.

Retour: (traduction alternative)
After crossing the Setcases-Tregura trail, we will have 3 more rappels and we will go out to the valley, after passing some pipes and a gate, we will see a path on our left. We will take it to return to the village
