Spécialités:

Matériel:
Cordes: 2x50m

Résumé:
Nice tour with many jumps. There's the option as well to do the upper part too.

Hydrologie:
Rather small catchment area, quite easy descent during the dry season.

Accès:
Shuttle is quite long, and the road is steep and bumpy, se better to have a good off road car.

Approche:
First part is on a track, then it goes down through the forest on a ridge.

Tour:
Most drops are quite straight forward, only one crack is a bit weird to downclimb, and the big waterfall has a revelation. A good amount of jumps can be done.

Retour:
Best is to park the car 1km uphill of the collector, even though this means quite a bit of a drive for the shuttle.

Those who like to make technical 5-12m jumps will enjoy the canyon, otherwise it offers nothing too special.
