Tour: (traduction alternative)
A beautiful little canyon. Rappels in the waterline are fun, but the old anchor points in the dry are not much fun and some of them are in very poor condition. The rock is very slippery and the water is comparatively fresh. Very nice view towards Novalesa to Claretto and Marderello.

Good water level. Very slippery in places. I donated a maillon at a belay station with double hooks. (traduction alternative)

We have refurbished the Rio Bard in places. However, only "expedition material" was used. The new abseil lines now run through the water - a great pleasure. The access is steep, but quickly done. The way back takes 3 minutes. 4 cascades between 15 and 40 meters, a 5-meter cascade and a dry rappel of 15 meters Further details: https://www.christian-balla.de/Bard https://www.youtube.com/watch?v=k5v7OzuP7Pk (traduction alternative)
