Résumé: (traduction alternative)
Short canyon for collectors, with access not too complicated and with one of the longest rappels in the area, 65m in canyoning.
Opened by members of EGAN as most of those in the area, for more info contact them.

Hydrologie:

Accès: (traduction alternative)
By the C16 we will be located in Guardiola de Bergedà.
Here we leave to take the B402 to La Pobla de Lillet where we will go 4kms until almost the camping L'Espelt, a few meters before we have the detour to the left to the Petroli mine, we will go up this track parallel to the Riutort, in a magnificent setting, surrounded by dense forests.
We will reach the ruins of the house of l'Estret (almost 4km), a few meters before we have on the left a track parallel to the torrent of the Coma by which we will go 1.5 kms and park at the point where the track crosses the stream.

Approche: (traduction alternative)
We go back 100m to see a track/path with red marks on the right (Ruta de l'Ermita) that will take us up to a hill and a track that we will take in NW direction towards the high tension lines, we will pass under the line and 200m later a path comes out on the right towards the back following a stream we will follow this stream until it turns to the north towards the cuttings.

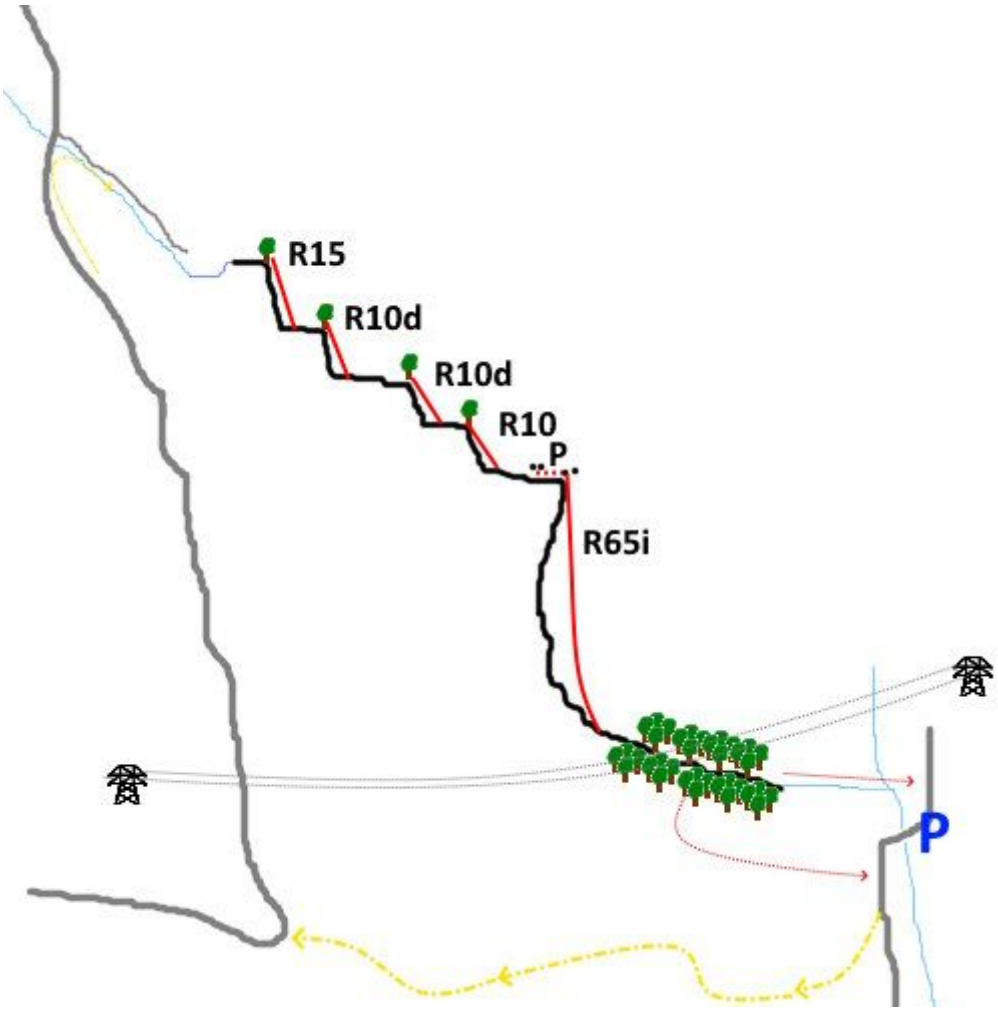

Tour: (traduction alternative)
See mole

Retour: (traduction alternative)
We will continue through the vegetation down in search of the torrent de la Coma, cross it and go up to the track. The descent is very closed, another possibility is to go to the right and go down along the power lines or following a trace of the wrongly named path that we can find.
