| Résumé: Deep and narrow canyon in the first part - afterwards more open - no escapes. | | |
| Hydrologie: | | |
| Accès: The road to reach the canyon is gravel road. A lot of gravel. Good to have 4x4 wheel drive. But is doable also without, just go slowly. | | |
| Approche: Follow the hiking path from the parking river right up to 1740m and go into the river. Follow the river and you will reach the canyon. | | |
| Tour: First 6 waterfalls are inside the deep and narrow part. After that the canyon opens, but still no escapes. Be careful on a 50m waterfall, since you abseil in the water course and there can be some falling rocks when you abseil. Last waterfall you can do as a double or triple pitch (anchors on the right - second anchor hard to reach). 2x60m ropes needed | | |
| Retour: From the canyon just follow the river bed to the car. | | |

| 2025-09-20 Tjaz ★★★★★ 📖 ★ 🪚 ★★ 🌊 Haut 🍌 Terminé All anchor points were in good shape. Water level was perfect. The big waterfall you abseil in the water course, its a little bit hard to abseil in water course. Also be careful because during the abseil the rocks were falling. I got one on my hand, the other guide on his knee. Maybe clean the waterfall before start abseiling. | | |
