Pays: Italia / Italy Région: Toscana Sous-région: Lucca Ville: Vállico di Sotto		
Difficulté: moins difficile	Niveau: v3 a3 II	Temps total: 2h50
Temps approche: 10min	Temps tour: 2h30	Temps de retour: 10min
Altitude d'entrée: 470m	Altitude de sortie: 260m	Altitude du delta: 210m
Longueur du canyon: 1000m	Rapelle le plus haut: 12m	Nombre de rappelles: 13
Transport: Voiture facultative	Type de roche:	Zone de prise d'eau: km ²
Saison:	Orientation: Sud	Meilleur moment:
Évaluation: ★ 2.6 (2)	Info: ★ 0 ()	Belay: ★ 0 ()
Spécialités:		
Matériel: Cordes: 1x30m		
Résumé: (traduction alternative) Not very deep forest canyon for rappeling		
Hydrologie:		
Accès: (traduction alternative) From Florence westwards on the A 11 or from La Spezia southwards on the A 12, then branching off eastwards from the A 12 at Viareggio onto the A 11, we reach Lucca. From here, head north up the Fiume Serchio valley on the SP 20 to Borgo (a good 21 km) and then continue along the orographic right bank for another 9 km until a road turns off to the WSW towards Fábbriche di Vállico. We follow the road - SP 37 - along the dammed Turríte Cava through some tunnels and after a good 5 km we come to a bridge that leads over the river to the right to some dilapidated houses (Molini) (a few meters further on the main road you can see a campsite on the right - at the bottom - of the river). At the bridge there is enough space for the first vehicle. Continue with the second until you reach the first houses of Fábbriche (7.5 km from the junction) and turn right at an acute angle uphill to Vállico di Sotto (another 3 km). Here we can park our second vehicle in the square at the entrance to the village.		
Approche: (traduction alternative) From the parking lot and the large tree, a small road leads downhill in a southeasterly direction (to the cemetery - cimitero). Before the bridge over the stream, take the path down to the right, then cross the stream to the left and after this stone bridge, at a suitable point, descend to the right into the streambed of the Rio Selvano. Alternatively, you can drive down the small road and park your car at the cemetery. Also from here then in a southwesterly direction to the streambed.		
Tour: (traduction alternative) Forest canyon, which gains in quality as it progresses. See also photos and video.		
Retour: (traduction alternative) Immediately after the stone bridge up to the right and over the bridge down the mule track to the dilapidated houses and the car beyond the bridge over the Turríte Cava.

Automatisch importiert von Descente-Canyon.com für Canyon Pili Nice canyon. I assume bigger flow for this canyon, but without problems. Well equipped as its a guided canyon. Some jumps and slides, but need confirmation due to trees in the canyon. Done without shuttle; easy and clear path along the canyon (+/-25min). At a junction a smaller track takes you to the confluences of both branches at the old mill (top one) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21970/observations.html>)
