Saison: mars - novembre	**Orientation:**	**Meilleur moment:**
Évaluation: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Spécialités:

Matériel:

Résumé: (traduction alternative)
Gully without great sporting interest, it does not have great verticals and forces to carry reinstallation material and not for that reason it is necessary to stop visiting it at some point. Its great views and the geological spectacle that offers where we can see the different forms of erosion in different types of rocks, formations, marmites...

Hydrologie:

Accès: (traduction alternative)
We are located in Ainsa (N260), we will take the A138 towards France through the Bielsa tunnel. After a few kilometers we will pass through Labuerda and at pk57 we arrive at Escalona.
We take the detour through the Añisclo canyon towards Fanlo on the HU631, shortly before reaching Nerín we will have a bridge over the river and a detour to the right to Sescué, if we have two cars we leave the return car here or on the Sescué track at the height of the ravine (150m).
With the access car we continue along the road and we get into Nerín, just before entering the village we have in front of us the ascent to the cross-country skiing track, here comes to stop the GR if we have only one car can be a good place to park. If not, we will continue climbing with the car to the hermitage and park there just before the path to the Mondoto peak (impressive viewpoint over the canyon of Añisclo).

Approche: (traduction alternative)
The path to the Mondoto peak leaves about 30m after the chapel, goes to the right (NE direction) quickly gaining height by the ragged southern slopes. We will cross a small ravine and a while later, when we are under the Estiva peak and Mondoto on the right, we will cross the Ballatar ravine.

Tour: (traduction alternative)
We will have to continue walking almost 10 minutes along the riverbed until we start with the projections. It is a fairly open canyon so we can escape at many points and some of the rappels can be climbed.

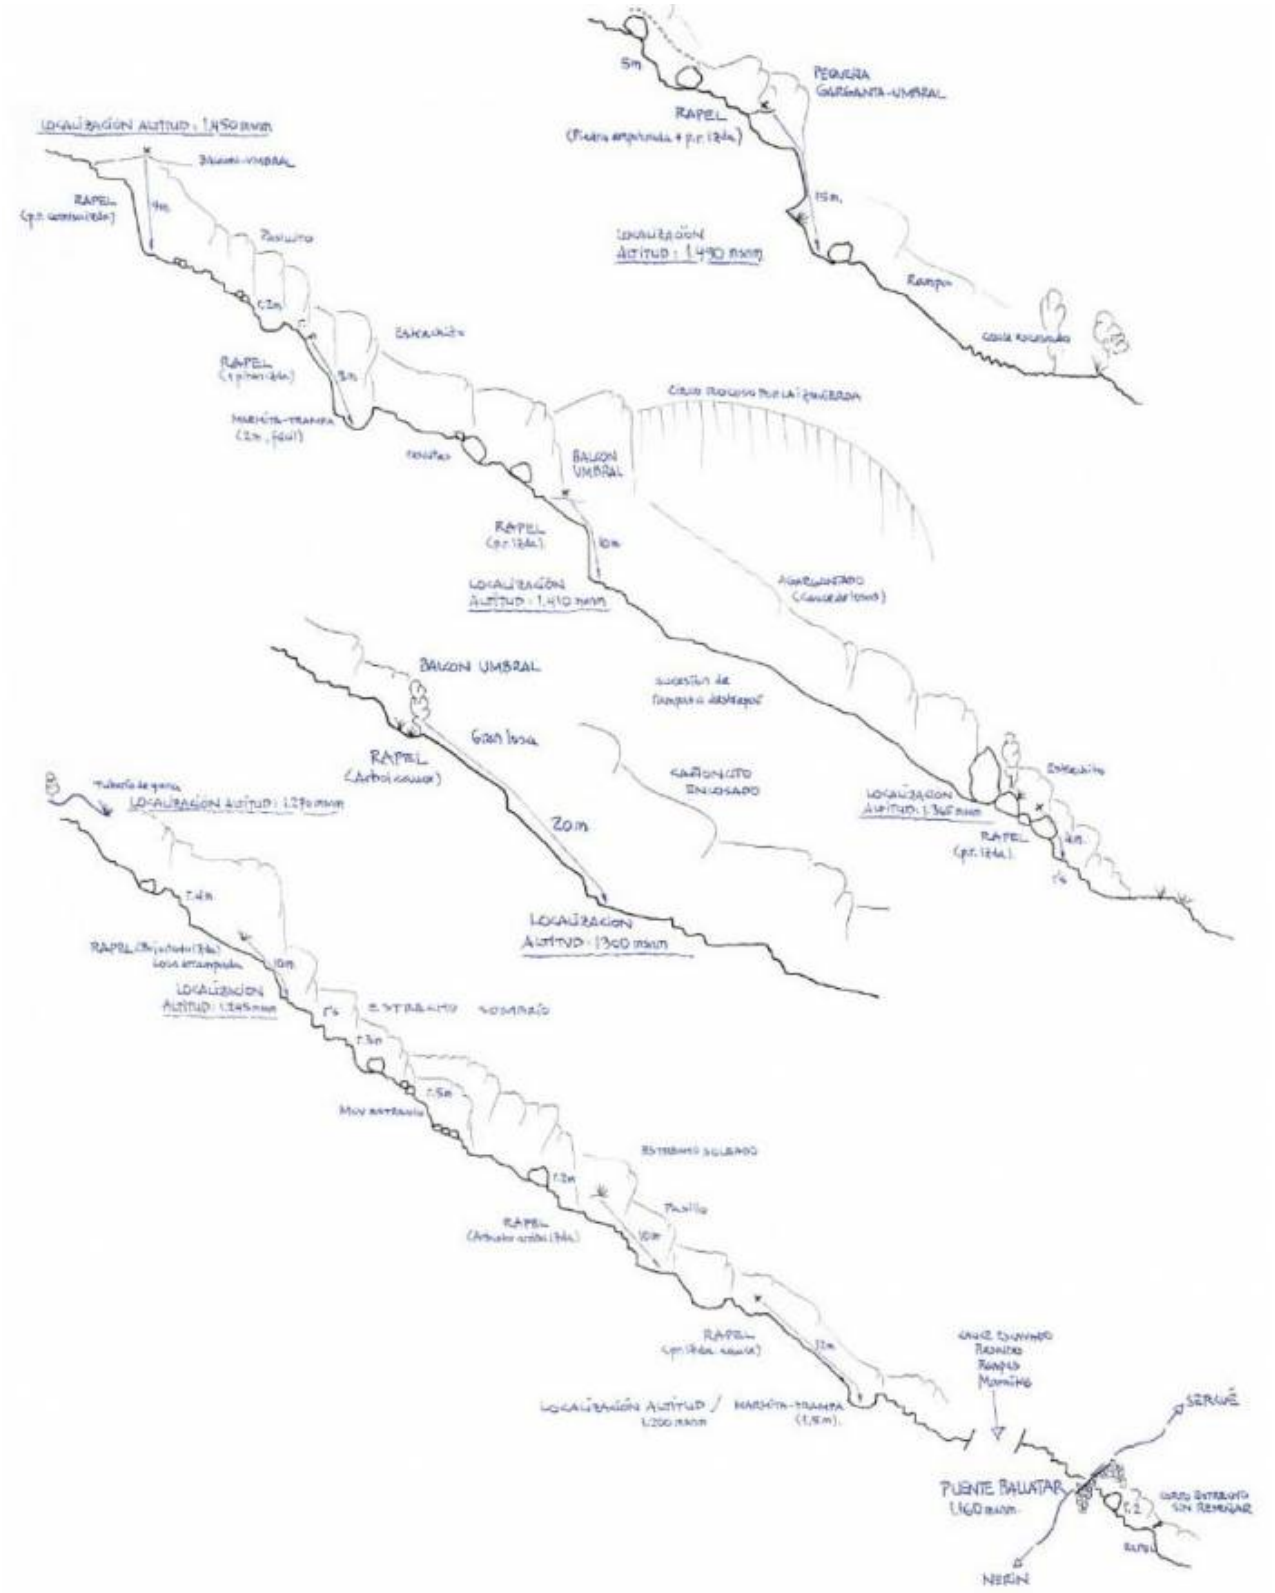

Retour: (traduction alternative)
Two options, at the Ballatar bridge go right along the GR to Nerín if you have only one car.
Or continue along the riverbed to the Sescué track.

Coordonnées:
Départ du Canyon 42.5833 0.0306
