Résumé: (traduction alternative)
Watery and attractive canyon with some not too high rappel.

Hydrologie:

Accès: (traduction alternative)
From Claut into Val Settimana and up to the park and picnic area where the road ends.

Approche: (traduction alternative)
From the parking lot, take the footbridge over the Settimana and continue on to Rifugio Pussa. Behind the mountain hut (where you can stop for a bite to eat!), take the trail uphill to the left. The trail initially heads toward the Rio Stuet valley and then runs along the slope in a northerly direction. At a fork with a signpost, take the trail toward Col de Post. It leads down to the Rio Stuet streambed (entry).

Tour: (traduction alternative)
In this beautiful, mostly narrow, and geologically interesting canyon, there are about 14 rappelling points (12 of which are numbered with SOS signs). Between the steps, there are short walking and scrambling passages. When the water level is high, the canyon can become very challenging, as it is absolutely necessary to wade through the water, especially in the lower section. Opportunities for small jumps or slides are rather the exception. At the end comes the highest rappelling point (approx. 25 m), followed by a small final step to downclimb, featuring a sulfur spring.

Retour: (traduction alternative)
At the confluence of the Rio Stuet with the Settimana, return to the parking lot via the wooden footbridge.

Perfect belay stations. Thanks! A very beautiful canyon with a place to stop for a break at the Refugio afterward; spotted a deer □□ in the pool in front of belay station No. 5; see the topographic view under "Internal." (traduction alternative)

In 2025, our team completely re-equipped the canyon with Raumer 12 mm resin anchors and double-bolt belays throughout. (traduction alternative)

The approach path is not too difficult. Compared to the Ciolesan we did yesterday, much more aquatic, even though it wasn't raining. At anchor point 5, you have to pass under the waterfall in a narrow section and climb onto a siphoned rock behind it. This was easier for us than it looked from above. (traduction alternative)

Excellent new equipment. 11 numbered waterfalls marked with SOS signs. In addition to these, many more breaks and passages have been installed. The passage below the waterfall, marked number 5, is currently deep and flowing. (traduction alternative)

The mix of anchors all ok, one of the last ones is a chain behind the corner a step down from the old 2 spits with rope (best not to miss the chain obviously) flow still considerable for the time of year. Done after Ciol del Pes
