Résumé: (traduction alternative)
Also known as Barranc de la Penya del Xorro or Xorrador, it is an interesting canyon quite open but with lots of vegetation. Impressive its last rappel "Xorrador".
The heights have added a few meters in the highs,5 on average.

Hydrologie:

Accès: (traduction alternative)
We must get to Alfafara. Take the A7 to Muro de Alcoy, exit on the CV700, cross Muro and continue straight ahead. After passing Agres we will arrive at Alfafara.
We can leave the car at the end of the Carrer de la Creu from where the approach path leaves or by the swimming pool or the Font Tarragó hostel which is the return.
If we want to combine cars we must take into account that there are 20kms of road. We will have to pass Bocairent and take the CV794 towards Alcoy. When passing the pk 9 there is a track on the left to the recreational area Font de Mariola, continue towards the Ermita de Sant Tomás and park wherever we can.

Approche: (traduction alternative)
From the access car we will follow the track that goes to the pass, we will leave the Fontanarets mass to the right and we will go to the watercourse that we have in front of us.
From Alfafara we will leave from the Carrer de la Creu, along the Carrer Serra de Mariola 100m to a small track that goes to the right and goes to the mountain. After 100m there is a small path on the right that we will follow until we reach another track. We take the track to the left, uphill, soon becomes a path that we follow, between trees, up this small ravine. The trail crosses the ravine and goes to the right to later turn south again and in a more open area, heading towards the mas. At almost 950m above sea level we will see a milestone that marks that we have to turn right to the walls that are already seen where the R1 is.

Tour: (traduction alternative)
A few first rappels in natural, to move to a quieter area before the Xorrador, its magnificent R45.

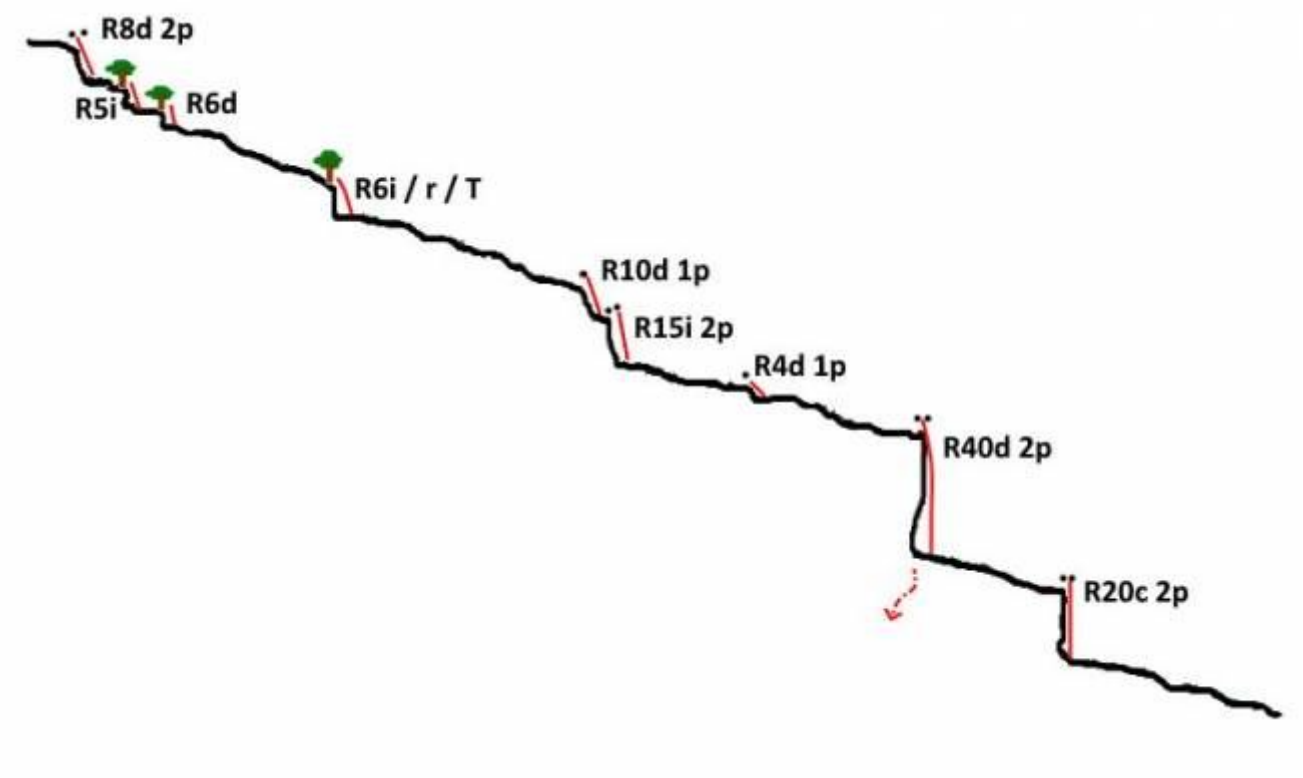

Retour: (traduction alternative)
When you reach the track, turn left towards the lodge.
