Résumé:

Hydrologie:

Accès: (traduction alternative)
We will leave Sant Llorenç towards Solsona by the Coll del Jou. At the pass we will take the LV-4241-b road. Just at the beginning of a long straight road we will find the Cap del Pla inn.
We will take to the right a road that goes further on towards Montpol - Pont del Clop and we will pass a farmhouse. A few meters later the road forks. We will take first the junction to the left and later another junction to the right. The road takes us to Pont del Clop. We will continue, we will pass the hermitage of Montpol and we will find a crossroads. We will go towards Cambrils being attentive to a track that comes out on the right and indicates Mas Carissols. We will go down this, pass Mas Carissols and pass a track on the left. We will arrive at some ruins, the ruins of Tentellatge. Here we will leave the car.
If we have two cars, we can leave the car at the end of the track, when it becomes impassable.

Approche: (traduction alternative)
We will descend behind the ruins looking for the obvious ravine. We are descending by a tributary that in fifteen minutes will take us to the first rappel of the ravine.

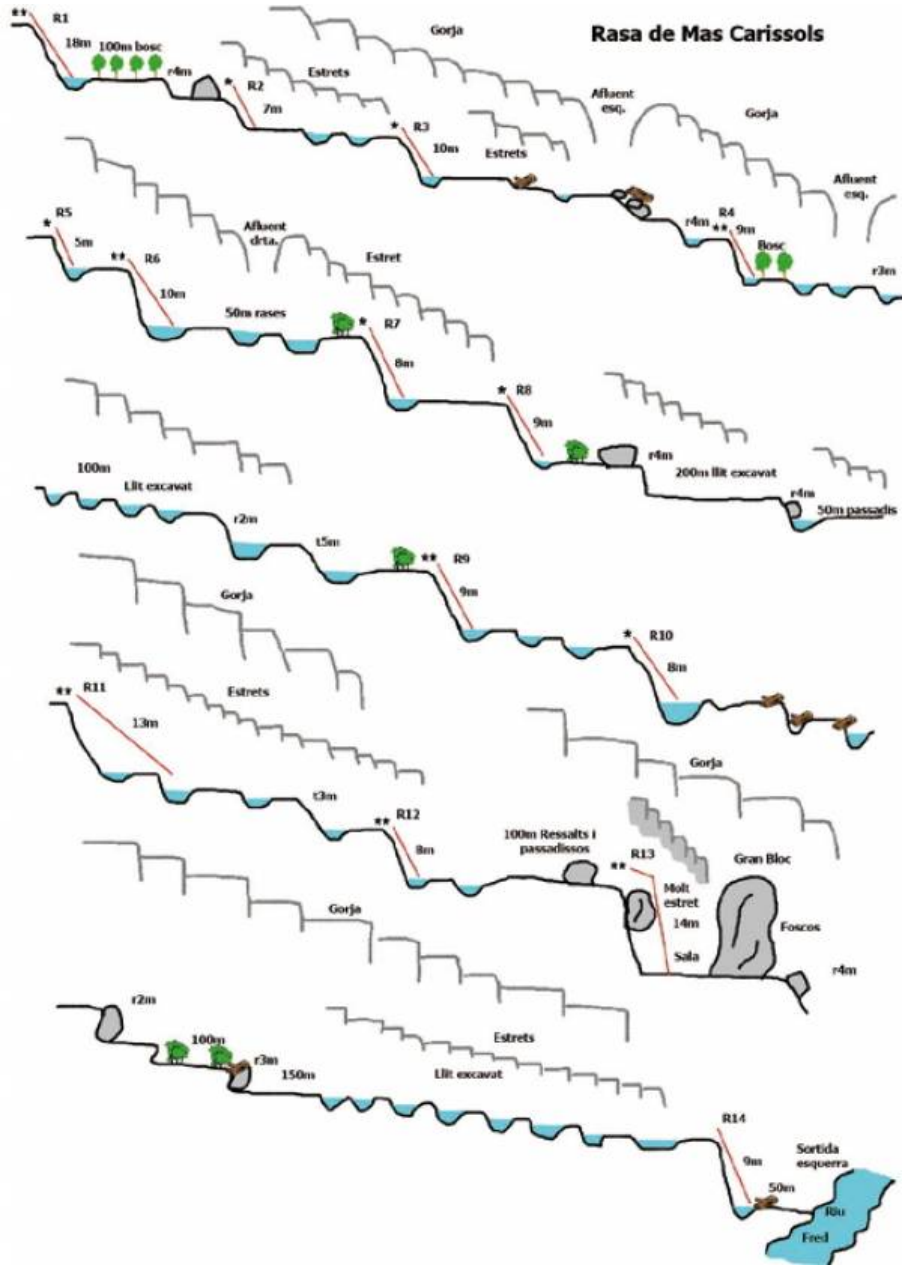

Tour: (traduction alternative)
Descent that in some sections reminds us of some conglomerate ravines of the Sierra de Guara. It begins a little dressed and monotonous but it is gaining interest. The final gorge is the most interesting part. The exit by the via ferrata gives it an added attraction.

Retour: (traduction alternative)
At the exit of the ravine, we will go uphill to the left in search of a forest. Behind the forest we will find a wall. We will continue until we find a section equipped with fixed ropes to help us get out. We will have to save about eight meters. We will continue climbing up the crest of the mountain until we find a path in about 25 minutes. This path will take us to the car in about 45 minutes.
