Résumé: (traduction alternative)
Raw data import from Descente Canyons https://www.descente-canyon.com/canyoning/canyon/21896

Hydrologie: (traduction alternative)
Large catchment area with glaciers, fairly large water catchment. You should therefore wait until late in the year to go there so that it is safer.

Accès: (traduction alternative)
From the main road, turn left at the top of the village and drive almost to the stream.

Approche: (traduction alternative)
After about 200m along the streambed comes the first abseil point.

Tour: (traduction alternative)
The canyon has been set up by guides, so there are many fixed ropes that lead to jumps.

Retour: (traduction alternative)
Climb steeply up through the forest on the right. You could park a second car on the road there, otherwise walk through the village to the start.
