| **Pays:** Italia / Italy **Région:** Piemonte **Sous-régione:** Vercelli **Ville:** Alagna Valsesia | | |
| **Difficulté:** un peu difficile | **Niveau:** v4 a1 II | **Temps total:** 2h50 |
| **Temps approche:** 50min | **Temps tour:** 1h30 | **Temps de retour:** 30min |
| **Altitude d'entrée:** 1350m | **Altitude de sortie:** 1240m | **Altitude du delta:** 110m |
| **Longueur du canyon:** 200m | **Rapelle le plus haut:** 30m | **Nombre de rapelles:** 7 |
| **Transport:** à pied | **Type de roche:** granite | **Zone de prise d'eau:** 1.00km² |
| **Saison:** avril - octobre | **Orientation:** Sud-Ovest | **Meilleur moment:** 10-16 Heures |
| **Évaluation:** ☆ 3 (3) | **Info:** ★ 2.5 (2) | **Belay:** ★ 2 (2) |

**Spécialités:**

**Matériel:**
Cordes: 1x70 m + 1x50 m

**Résumé:**
Vertical canyon with a continuous sequence of rappels within a narrow slot; water levels are low or dry in summer, but it becomes highly technical in spring when water flow is high.

**Hydrologie:**

**Accès:**
From Varallo Sesia continue on SP299 to Alagna Valsesia; after the village of Boccorio, there is a tunnel: immediately after the tunnel and before the bridge on the Sesia river, turn right on a smaller road, after about 100 m, leave the car in the parking area.

**Approche:**
From the parking area, follow the dirt road to the right; after about 200 meters, you will see red and orange markers on the right. Ascend through the woods, following the markers along faint paths and old trails. You will reach a grove of large beech trees and then a power pylon; continue the steep ascent, still following the red/orange markers. At a certain point, you emerge from the woods and the path becomes more distinct, winding along the easiest lines of the steep slope (markers continue). You arrive near the stream and cross it; this is the exit point for the upper section and the entry point for the lower section (the canyon's only escape route). For the upper section, continue the ascent following the markers, now along the orographic left side of the canyon. At a very steep spot, use a fixed rope for assistance; then reach a large pine tree. Further on, the path approaches the canyon; looking over the edge reveals the stream below. Climb another 50 meters to a point where the path overlooks the canyon drop-off; the markers end here, and you rappel down about 30 meters from a tree to reach the stream.

**Tour:**
After rappelling down from the tree, you immediately encounter the highest waterfall (45 m), split into an R15 (left) + R30 (right). Next come an R17 (right) + R20 (left); the latter is very narrow and can be dangerous during periods of high flow. This is followed by MC10 (left) + C30 (left), the latter also being very narrow. The canyon concludes with an R15 (right), the only open waterfall on the route. For now, is all bolted in 10mm fix inox sigle points.

**Retour:**
After the last abseil, descend on the same path of the approach.

**Coordonnées:**
Départ du Canyon 45.8277 7.9800
Fin du Canyon 45.8270 7.9790
Parking à l'entrée et à la sortie 45.8235 7.9794

**Rapports:**

2026-10-24 | Herbert von Neumann | ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ ★ | 〰 Faible | 👍 Terminé
Was curious to see this new canyon near home... the ascent trail is streep but well marked, the canyon with a bit of (freezing) water is nice, you almost never walk from the first to last waterfall, some anchors could be improved

2026-08-16 | Matteo Delfitto | ☆ ☆ ☆ |🕮 ★ ★ |⚓ ★ ★ | 〰 Sèche | 👍 Terminé
Upon returning, we improved the anchors in the upper section and continued exploring the lower section as well; some descents are still on a single anchor point. Here are some photos showing the profile of the entire descent. (traduction alternative)

2026-08-13 | Matteo Delfitto | ☆ ☆ ☆ |🕮 |⚓ | 〰 Sèche | 👍 Terminé
First descent of the upper section of this stream... it’s dry right now, so you can do it even without a wetsuit; when there’s water, it gets technical, and you have to watch where you step on certain descents (risk of getting stuck) Beautiful quartz veins in the rock in some spots... a tough approach that’s very well marked... even when dry, the stream offers some interesting views... the lower section, which is even narrower, still needs to be equipped... (traduction alternative)
