Spécialités:
Bassin de retenue, évacuation de l'eau sans automatisme,

Matériel:
Cordes: 2x40m

Résumé: (traduction alternative)
Hiking canyon with smaller rappels, slides and possible jumps
Note from the description of the Auerklamm (from Wolfsbrücke): "the upper part of the Auerklamm (above the Wolfsbrücke) is not recommended as you cross private property; is very heavily used commercially"
Attention: The upper Auerklamm has no regular exit at its exit at the Wolfsbrücke, so that you have to descend the following parts after the Wolfsbrücke at least to the next exit after 3 more steps (see the topo drawing "Mittlere Auerklamm" at https://alpinesicherheit.com/2008/auerklamm-canyoning-schluchtenfuehrer/). Therefore, the information on the exit height and highest rappel is based on the entire section below the Wolfsbrücke. However, there is now also an exit option in the upper section of the gorge via a via ferrata. However, this is not at the exit of this upper part before the Wolfsbrücke, but after the 3rd rappel (C8), see the book by Amor/Timl , topo drawing on p. 116.

Hydrologie: (traduction alternative)
Above there are 2 reservoirs that drain into the gorge in the event of an emergency. There is also a reservoir at the entry to the Upper Auerklamm which "rarely releases relatively small" amounts of water. Mainly a problem for the Upper and Middle Auerklamm. (therefore plan in reserves). To read at https://alpinesicherheit.com/2008/auerklamm-canyoning-schluchtenfuehrer/
As a rule, there is plenty of water flow, so it is advisable to only undertake an ascent after the snow has melted.

Accès: (traduction alternative)
Leave the Inntalautobahn at Haiming in the direction of Ötztal. Continue to Ötz, at the exit of the village turn left towards Kühtai. We come up to Taxegg, drive through the village in the direction of Kühtai and park our car at the exit of the settlement near the bridge over the Nederbach in a suitable and, in particular, undisturbed place.

Approche: (traduction alternative)
From the bridge we then follow the course of the stream to a small weir, below which we begin our descent.

Tour: (traduction alternative)
First longer running sections with downclimbs. Then a total of 6 rappels, again interrupted by running sections. After the 3rd rappel, exit on the left via a via ferrata. We have to continue our descent at the Wolfsbrücke bridge, at least as far as the next exit option (see also https://alpinesicherheit.com/2008/auerklamm-canyoning-schluchtenfuehrer/ and the book by Riml/Amor).

Retour: (traduction alternative)
Depends on the exit chosen, see in detail the books and internet sites mentioned.

Coordonnées:
Départ du Canyon 47.2174 10.8847
Fin du Canyon 47.2145 10.8705
Parking à l'entrée 47.2172 10.8858
Parking à la sortie 47.2141 10.8687

Rapports:

2024-07-06 | Bavarian Canyoning | ☆ ☆ |🕮 ★ |⚓ ★ | 〰 Normale | 👍 Terminé
We walked to the point where a steel cable crosses the stream and a small via ferrata runs along the right-hand side. There are a lot of trees in the stream and many rappels are very difficult to master. Jumps are not feasible. The entire riverbed is very slippery. The picks are mostly in good to very good condition. Overall, it is not a very rewarding canyon that should only be attempted by collectors. (traduction alternative)

Some wood but not really disturbing. (traduction alternative)
