Résumé: (traduction alternative)
gloomy, vertical rappel canyon, mostly with a lot of water, which can not be avoided several times;
first rappel with free transfer; rappel (r) under big block (lamp!!!) can be defused by short hanging and overclimbing right into a chute; strongly flood & mudflow endangered!
A mudflow in 2011 (?) has filled the underground part of the canyon, so that it is not accessible (as of 2023).

For a long time you wonder what you are doing here. And suddenly it goes boom, 50m into the dark gap. Unfortunately, a few more blocks afterwards... (traduction alternative)
