Résumé: (traduction alternative) Beautiful canyon with some jumps and slides. Is virtually a beginner tour in this region.		
Hydrologie:		
Accès: (traduction alternative) Claut - Lesis. Shortly after Lesis you come to a bridge over the Cellina. After that parking		
Approche: (traduction alternative) Follow path 391, which soon leads to an alpine meadow with several buildings. Immediately at the first building turn left (marking and path difficult to see) and climb left to the edge of the forest. Then on a beautiful path in many hairpin bends steeply uphill. When the path flattens out again, after crossing a mostly dry streambed, an unmarked path branches off to the left - this path first leads to the ruins of an old material cableway, then steeply down to the streambed of the Ciol della Val, which you reach 2 rappels before it flows into the Ciolesan. This access "saves" the 4 not very interesting rappels of the upper Ciol della Val, the required rope is then also reduced to 1x 40m: those who want to walk the stream from the top simply follow the marked path until it meets the Ciol della Val.		
Tour: (traduction alternative) First sunny, open canyon, then from the tributary of the Ciolesan narrow and more spectacular. Some very tight rappel.		
Retour: (traduction alternative) As the streambed opens up, you will see a water line stretched across the canyon. Exit here to the left and follow the water pipe along a clear path that leads back to the parking lot

Automatisch importiert von Descente-Canyon.com für Canyon Ciolesan Armi ok anche nell'affluente Ciol della Val.Presenza di MC fissi.Molte pozze nuovamente tuffabili.Roccia fornisce molto grip.Avevo brutti ricordi, ma oggi mi sono ricreduto...gran bella riscoperta (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21713/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Ciolesan Et c'est reparti pour les crues!On s'est rabattu sur la cascata saleduogna toute proche. Normalement sèche et là magnifique pendant les pluies. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21713/observations.html>)

We started in the middle of the day. It was a nice tour with many shorter rappels. Water level according to the reference photo did not cause any problems in the narrow sections, should still be possible with a slightly higher water level. Be careful at the beginning at the first house to the left up into the forest (GPS was helpful). (traduction alternative)

Some anchor points are worse, but all in all doable. Everything was good ♥

Quite a few screws have been removed since my last visit, but the equipment is still adequate. There is freshly fallen wood, but it's not a problem. Otherwise in nice condition. (traduction alternative)

Automatisch importiert von Descente-Canyon.com für Canyon Ciolesan Higher water than usual but not as high as other creeks in the area. Very slippery but impressive and fun. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21713/observations.html>)

Steep climb that is worth it. Great tour with narrow places. Very slippery. Stands all i.o! (traduction alternative)

2023-08-11 | Wolfgang Streicher | ⭐⭐⭐⭐ |📖⭐⭐|📍⭐⭐|🌊 Normale | 🟢 Terminé

At the beginning difficulties in finding the way. At the bumpy chute after the 2nd rappel I miss a hook for a situation with strong water flow. The attractive jumping pit is gravelled. The wayfinding for a speedy exit turned out to be difficult. (traduction alternative)

2023-06-09 | Horst Lambauer | ⭐⭐⭐⭐ |📖⭐⭐⭐|📍⭐⭐⭐|🌊 Haut | 🟢 Terminé

The upper part is also quite fun with 2 jumps and a few rappels. In addition, it is interesting how the character of the gorge changes. Above the open forest canyon and then increasingly narrow cut. Stands in perfect condition. We were a good team and were 2.75h car-car. (traduction alternative)
