Résumé: (traduction alternative)
As the friends of Embarrank2 comment "Entertaining descent, located between Traslasierras de Granadilla and the Ambroz Valley.
It has 10 rappels, the longest one 30 meters".
Another nice gorge in the area of Hervás although this one with little flow except rainy season.
Check possible prohibition from February 15 to July 31, due to nesting.

Hydrologie:

Accès: (traduction alternative)
By the A66 almost next to Hervás, we will have to leave the highway and go to Jarilla.
As soon as we enter the village, in the small square we take a left uphill towards the washing place after the church, we continue along this street straight ahead and after 100m we have a fork, here the street becomes a forest track, we take the one on the left and continue along the track for 3km, just here there is a track on the right going back uphill, we follow it and in the next left curve we can park here or continue along the track, which goes straight ahead if we have a high vehicle until almost the river.

Approche: (traduction alternative)
If we have parked in the curve we will follow this track upwards, after 3km we reach a picnic area, the track would continue upwards but we leave it to take the path and head towards the headwaters.
If we have parked on the track almost next to the gorge we will have to go up on the right.

Tour:

Retour: (traduction alternative)
When we reach a black irrigation pipe, we exit to the right.
